

PACIFIC CONSERVATION BIOLOGY

Volume 7

Number 3

ISSN 1038-2097

Contents

PUBLISHER'S NOTE	151
VIEWPOINT	
The conflict between animal welfare and conservation. <i>G. R. Fulton and H. A. Ford.</i>	152
RESEARCH PAPERS	
The Pied Currawong's role in avian nest predation: a predator removal experiment. <i>G. R. Fulton and H. A. Ford.</i>	154
Culture, commerce, and international co-operation in a global recovery of Polar Bears. <i>M. M. R. Freeman.</i>	161
Impacts of agricultural land use on the floristics, diversity and life-form composition of a temperate grassy woodland. <i>S. D. Hamilton.</i>	169
Cattle, mining or fire? The historical causes of recent contractions of open forest in the wet tropics of Queensland through invasion by rainforest. <i>R. Hill, D. Smyth, H. Shipton and P. Fischer.</i>	185
Abundance and decline of isolated trees in the agricultural landscapes of central New South Wales, Australia. <i>A. Ozolins, C. Brack and D. Freudenberger.</i>	195
Conservation of relict potato <i>Solanum tuberosum</i> cultivars within Māori communities in New Zealand. <i>G. Harris.</i>	204
BOOK REVIEWS	
With Friends Like Bjorn Lomborg, Environmentalists Don't Need Enemies. <i>C. Hamilton and H. Turton.</i>	214
Introduction to Conservation Genetics. <i>L. Lim.</i>	217
Doing Science. Design, Analysis and Communication of Scientific Research. <i>C. J. Svensson.</i>	219

Papers submitted to *Pacific Conservation Biology* are vigorously reviewed and edited. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations.

Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. Please indicate whether one or more of the authors is a subscriber. Not subscribing will not affect the publication of the paper. However, whereas subscribers receive 25 free reprints and do not pay page charges, non-subscribers do not receive free reprints and will be asked to pay a nominal AUD\$20 per printed page. These charges will be invoiced when page proofs are sent to authors. If they do not receive grant or institutional support for publication, contributors may request an exemption from page charges. This is similar to procedures followed by other journals, including the Australian Ecological Society and the Royal Society of Western Australia in the publication of their journals. Authors may accelerate publication of their papers to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page. This still represents a significant publication subsidy.

For your convenience subscription forms have been enclosed. The increased cost is largely the result of the introduction of a government sales tax on knowledge in Australia. If you already subscribe, assist the conservation of biodiversity in the Pacific Region by encouraging a colleague and/or library to subscribe.
