

PACIFIC CONSERVATION BIOLOGY

Volume 18

Number 4

Contents

EDITORIAL

Archives and conservation biology. *Sebastian Schuch.* 223

Obituary, Ivor E. Beatty OAM. *Denis A. Saunders and Harry F. Recher.* 225

RESEARCH PAPERS

Impacts of tourism on threatened species in the Pacific region: a review. *Clare Morrison.* 227

The North West Cape, Western Australia: A Potential Hotspot for Indo-Pacific Humpback Dolphins *Sousa chinensis*? *Alex Brown, Lars Bejder, Daniele Cagnazzi, Guido J. Parra and Simon J. Allen.* 240

Identification of a resident community of bottlenose dolphins (*Tursiops aduncus*) in the Swan Canning Riverpark, Western Australia, using behavioural information. *Delphine Chabanne, Hugh Finn, Chandra Salgado-Kent and Lars Bejder.* 247

Factors influencing early restoration progress of a *Eucalyptus tereticornis* open forest on former agricultural land. *Tom Lewis, David Taylor, Scott Swift and Valerie Debuse.* 263

Are vegetation interfaces important to foraging insectivorous bats in endangered coastal saltmarsh on the Central Coast of New South Wales? *Leroy Gonsalves, Bradley Law, Cameron Webb and Vaughan Monamy.* 282

Videographic evidence of endangered species depredation by feral cat. *Seth Judge, Jill S. Lippert, Kathleen Misajon, Darcy Hu and Steven C. Hess.* 293

Predicting trends in humpback whale (*Megaptera novaeangliae*) abundance using citizen science. *Nicoló Tonachella, Aurora Nastasi, Gregory Kaufman, Daniela Maldini and Robert William Rankin.* 297

The efficacy of soil ameliorants to improve early establishment in trees and shrubs in degraded *Eucalyptus gomphocephala* woodlands. *Katinka X. Ruthrof, Tegan K. Douglas, Michael C. Calver, Michael D. Craig, Bernard Dell and Giles E. St. J. Hardy.* 310

Species adaptation to both fire and climate change in tropical montane heath: Can *Melaleuca uxorum* (Myrtaceae) survive? *Andrew J. Ford and Britta Denise Hardesty.* 319

BOOK REVIEW

Saving a million species: extinction risk from climate change. *Jo Isaac.* 239

Temperate woodland conservation and management. *Bernie Masters.* 324

Index of Volume 326

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations. Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. The Editor-in-Chief will ask whether any of the authors is a subscriber when confirming acceptance of a paper. If one or more authors is a subscriber, there will be no charge for publication, unless the authors have agreed to pay the charges for colour or accelerated publication (see below). If no author subscribes, the corresponding author will be invoiced a nominal Aud\$20 per page including a PDF of the published article and charges for colour or accelerated publication (see below). Whether or not one or more authors subscribes has no bearing on the acceptance of a paper. Authors may choose to include colour figures in their papers at a cost of Aud\$150 per page with a colour component. Authors may also accelerate publication to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page.

For your convenience subscription forms are enclosed. If you already subscribe, assist the conservation of biodiversity in the Pacific region by encouraging a colleague and/or library to subscribe.
