

PACIFIC CONSERVATION BIOLOGY

Volume 19

Number 3 and 4

Contents

EDITORIAL

- Ivor Beatty: Publisher with a red pen. *Graham R. Fulton.* 187

RESEARCH PAPERS

- Response of birds to a wildfire in the Great Western Woodlands, Western Australia. *Harry F. Recher and William E. Davis, Jr.* 188
- The birds of "Koobabbie" in the northern wheatbelt of Western Australia (1987–2011) and the contribution of the farm to conservation of the region's avifauna. *Denis A. Saunders and Alison Doley.* 204
- Wildlife roadkill: illuminating and overcoming a blind spot in public perception. *Daniel Lunney.* 233
- From biodiversity to bioperversity: from good science to poor environmental policy. *David Lindenmayer.* 250
- Enhancing our Heritage: Conservation for 21st Century New Zealanders: Ways forward from the Tahiti Group of Concerned Scientists. *John Craig, Henrik Moller, David Norton, Denis Saunders and Morgan Williams.* 256
- Invasive ungulate policy and conservation in Hawaii. *Mary Ikagawa.* 270
- Keeping Australia's islands free of introduced rodents: the Barrow Island example. *Penelope Greenslade, Andrew A. Burbidge and A. Jasmyn, J. Lynch.* 284
- Provenance Errors and Vagrants: Their Role in Underestimating the Conservation Status of Sea Kraits (Elapidae: Laticaudinae). *Harold Heatwole and Harold Cogger.* 295
- Are we underestimating the threat to Australia's migratory land birds? *Hugh A. Ford.* 303
- Human community ecology: making connections for conservation. *Chris R. Dickman.* 312
- Users beware: implications of database errors when assessing the individual research records of ecologists and conservation biologists. *Michael C. Calver, Stephen J. Beatty, Kate A. Bryant, Christopher R. Dickman, Brendan C. Ebner and David L. Morgan.* 320
- Native vertebrate herbivores facilitate native plant dominance in old fields while preventing native tree invasion — implications for threatened species. *Janeane Ingram and Jamie B. Kirkpatrick.* 331
- The Australian monsoonal tropics: An opportunity to protect unique biodiversity and secure benefits for Aboriginal communities. *C. Moritz, E. J. Ens, S. Potter and R. A. Catullo.* 343
- From Botany Bay to Breathing Planet: an Australian perspective on plant diversity and global sustainability. *Stephen D. Hopper.* 356
- Conservation of waterbirds in Australia. *R. T. Kingsford.* 366
- Wild Terrestrial Vertebrates Sold as Food in Open Markets in Laos. *David Davenport and Harold Heatwole.* 379
- Publication models in a changing environment: bibliometric analysis of books and book chapters using publications by Surrey Beatty & Sons. *Michael C. Calver, J. B. Fontaine and T. E. Linke.* 394
- Internal macrobioerosion on five species of *Acropora* following the 1998 bleaching event: Implications for the long-term impact of bleaching on the Great Barrier Reef. *Pat Hutchings, Mireille Peyrot-Clausade and Anke Ståken.* 409
- Predictor sets and biodiversity assessment: the evolution and application of an idea. *R. L. Kitching and L. A. Ashton.* 418
- Index of Volume 19 427

 Amphibian Biology (Vol. 9 Part 2)
 Amphibian Biology (Vol. 10)
 Australian Broad-tailed Parrots — The <i>Platycercus</i> and <i>Barnardius</i> Genera
 Australian Ecosystems: 200 years Utilization, Degradation and Reconstruction
 Australian Grass Parrakeets — The <i>Neophema</i> Genera
 Australian Grass Parrakeets — The <i>Psephotus</i> and <i>Northiella</i> Genera
 Australian Indigenous Orchids (Vol. 1)
 Australian Indigenous Orchids (Vol. 2)
 Australian Lorikeets
 Australian Rainforests in New South Wales: Vol. 1
 Australian Rainforests in New South Wales: Vol. 2
 Australia's Most Threatened Ecosystems — the southeastern lowland native grasslands
 Back from the Brink
 Bandicoots and Bilbies
 Behavioural Ecology of Galahs
 Biodiversity in Mediterranean Ecosystems of Australia
 Biology and Evolution of Australian Lizards, The
 Biology and Evolution of Australian Snakes, The
 Biology of Australian Possums and Gliders, The
 Biology of the Koala
 Birds of Eucalypt Forests and Woodlands
 Birds of Rottnest Island (Revised Edition)
 Birds of Southwestern Australia: an atlas of distribution and abundance of the wheatbelt avifauna
 Birds of Sydney
 Botanical Endeavour, The
 Cabinet of Reed-warblers, A
 Capes and Captains
 Care and Handling of Australian Native Animals, The
 Companion to Kimberley Rainforests Australia
 Conservation Biology in Australia and Oceania
 Conservation of Australian Wetlands, The
 Conserving Biodiversity: Threats and Solutions
 Coral Reef Handbook, A
 Crocodiles: Inside Out
 Crocodilian Biology and Evolution
 Ecology of Australia's Wet Tropics, The</p> | <p>Ecology for Everyone — Communicating Ecology to scientists, the public and the politicians
 Ecology of Reptiles
 Exploring Central Australia
 Field Guide to Australian Butterflies, A
 Field Guide to the Rodents and Dasyurids of the Northern Territory
 Forest Management in Australia
 George Caley — 19th Century Naturalist
 Gondwanan Heritage
 Gorillas in the Garden
 Guidelines for Bush Corridors
 Healing the Planet
 Heard Island: Southern Ocean Sentinel
 Kangaroos, Wallabies and Rat Kangaroos (2 vols)
 Key and Field Guide to the Australian Possums, Gliders and Koala, A
 Kimberley Rainforests
 La France. Ses Rapports Historiques avec les Autres Peuples (2 vols)
 Learning from Life
 Lost Years, The
 Marine Mammal Research in the Southern Hemisphere
 National Parks of Northern New South Wales — NPA Guide
 Nature Conservation 2 — The Role of Corridors
 Nature Conservation 3 — Reconstruction of Fragmented Ecosystems
 Nature Conservation 4 — The Role of Networks
 Nature Conservation 5 — Conservation in Production Environments: Managing the Matrix
 Numunwari
 Pearl Beach Legacy — The Story of Minnard Crommelin
 Penguins: Ecology and Management, The
 Perspectives on Wildlife Research
 Possums and Opossums: Studies in Evolution (2 vols)
 Remnants of Gondwana
 Repairing a Damaged World
 Reintroduction Biology of Australian and New Zealand Fauna
 Snow — A Natural History; an Uncertain Future
 Sydney Flora
 Tasmania: A Natural History
 Temperate Eucalypt Woodlands in Australia
 Thistle Y. Harris (A biography of Thistle Yvette Stead)
 U.C. System for Producing Healthy Container-grown Plants
 Uncovering Australia's Dreamtime (Reprinted)

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations. Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. The Editor-in-Chief will ask whether any of the authors is a subscriber when confirming acceptance of a paper. If one or more authors is a subscriber, there will be no charge for publication, unless the authors have agreed to pay the charges for colour or accelerated publication (see below). If no author subscribes, the corresponding author will be invoiced a nominal Aud\$20 per page including a PDF of the published article and charges for colour or accelerated publication (see below). Whether or not one or more authors subscribes has no bearing on the acceptance of a paper. Authors may choose to include colour figures in their papers at a cost of Aud\$150 per page with a colour component. Authors may also accelerate publication to the next available issue without penalty to other authors by paying full page charges of Aud\$65 per page.

For your convenience subscription forms are enclosed. If you already subscribe, assist the conservation of biodiversity in the Pacific region by encouraging a colleague and/or library to subscribe.
