

# PACIFIC CONSERVATION BIOLOGY

Volume 3

Number 1

ISSN 1038-2097

## Contents

### EDITORIAL

- State of Australia's environment. *H. F. Recher.* 1

### NEWS AND VIEWS

- National Biodiversity Council. *H. F. Recher.* 2

### ANNOUNCEMENTS 3

### FORUM ESSAYS

- The 10 Lords of the Universe — the New South Wales TSC Act's Committee. *L. Lim.* 4

### RESEARCH PAPERS

- Ecological attributes of the threatened fauna of New South Wales. *D. Lunney, A. L. Curtin, D. Fisher, D. Ayers and C. R. Dickman.* 13

- The impact of planting for restoration of remnant bushland on its scientific and educational values: implications for conservation planning. *L. McLoughlin.* 27

- Translocation of the Palila, an endangered Hawaiian honeycreeper. *S. G. Fancy, T. J. Sneysinger and J. D. Jacobi.* 39

- The Kangaroo Rats of California: endemism and conservation of keystone species. *R. L. Goldingay, P. A. Kelly and D. F. Williams.* 47

- Threats on Pacific islands: the spread of the Tramp Ant *Wasmannia auropunctata* (Hymenoptera: Formicidae). *H. Jourdan.* 61

- Colonizing Cane Toads cause population declines in native predators: reliable anecdotal information and management implications. *S. Burnett.* 65

### BOOK REVIEWS

- The *Australian Zoologist* — successful opportunist in a changing environment? Ed. by D. Lunney and L. Dawson. *A. Boulton.* 73

- Conservation of Australia's Forest Fauna. Ed. by D. Lunney. *R. E. Fox.* 74

- People and Nature Conservation. Perspectives on Private Land Use and Endangered Species Recovery. Ed. by A. Bennett, G. Backhouse and T. Clark. *Dr C. L. Gross.* 75

- Herpetology in Australia: A Diverse Discipline. Ed by D. Lunney and D. Ayers. *R. Harlen.* 76

- Gondwanan Heritage. Ed. by S. Hopper, J. Chappill, M. Harvey and A. George. *H. F. Recher.* 77

- Future of the fauna of western New South Wales. Ed. by D. Lunney, S. Hand, P. Reed and D. Butcher. *D. Oliver.* 78

Papers submitted to *Pacific Conservation Biology* are vigorously reviewed and edited. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

### COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations.

Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

ON FRONT COVER: **Wandoo woodland at Dryandra in Western Australia:** The wandoo woodlands at Dryandra are one of the largest and least disturbed remnants of this formerly widespread community. They sustain a unique assemblage of threatened fauna which includes Numbats, Woylies, Rufous Treecreepers, Malleefowl and Yellow-throated Honeyeaters. However, conservation of much of this fauna requires the control of the European Fox. To do this, Western Australia has initiated a high profile programme of fox control called "Western Shield". Western Shield has not only assisted in the recovery of animals like the Numbat, but has promoted wildlife conservation and management among the Western Australian public. Similar programmes could be initiated in other states with equal benefit to biological conservation.
