AUSTRALIAN JOURNAL OF PHYSICS

VOLUME 17

MELBOURNE
1964

AUSTRALIAN JOURNAL OF PHYSICS

Published by the Commonwealth Scientific and Industrial Research Organization. Volumes 1 to 5 of the Australian Journal of Physics and the Australian Journal of Chemistry issued as the Australian Journal of Scientific Research, Series A: Physical Sciences. Issued quarterly, £2 per annum.

BOARD OF STANDARDS

The Board of Standards for this Journal is appointed by the Commonwealth Scientific and Industrial Research Organization and the Australian Academy of Science and consists of Professor W. P. Rogers (Chairman), Mr. A. E. Scott (Editor-in-Chief), Professor N. S. Bayliss, Dr. M. F. Day, Professor R. Street, and Professor J. S. Turner.

ADVISORY COMMITTEE

Acceptance of papers for this Journal is in the hands of an Advisory Committee appointed by the Board of Standards in consultation with the Australian Institute of Physics and consisting of Mr. A. E. Scott (Editor-in-Chief and Chairman), Emeritus Professor Sir Leonard Huxley, Professor C. B. O. Mohr, Dr. C. H. B. Priestley, Professor R. Street, and Professor H. C. Webster.

All enquiries and manuscripts should be forwarded to:

The Editor-in-Chief,
Editorial and Publications Section, CSIRO,
Sixth Floor,
372 Albert Street,
East Melbourne, C.2, Victoria

CONTENTS

NUMBER 1, MARCH 1964

	PAGE
Two-body bound state and scattering with non-central forces. By A. F. Nicholson	1
The mechanical impulse method for determining dynamic elastic moduli and internal friction of solids. By H. F. Pollard	8
Thermal properties of systems exhibiting optimum countercurrent heat exchange. By R. C. L. Bosworth and C. M. Groden	26
Optimum thermal efficiency in countercurrent heat exchangers. By R. C. L. Bosworth and C. M. Groden	37
Absolute intensities of characteristic $K\alpha$ radiation from an inclined copper target. By V. Metchnik	45
Luni-solar variations in the ionosphere. By R. A. Duncan	50
A new energy level in ^{20}Ne at 10.31 MeV . By D. G. Sargood and G. D. Putt	56
On external radio emission from the Earth's outer atmosphere. By G. R. A. Ellis	63
A study of whistling atmospherics. IV. Comparison of observations at widely spaced stations. By J. Crouchley	75
A study of whistling atmospherics. V. Dispersion. By J. Crouchley	88
Extended radio sources. I. By D. K. Milne and P. A. G. Scheuer	106
A sky survey of neutral hydrogen at $\lambda\ 21\text{ cm}$. III. Gas at higher radial velocities. By R. X. McGee and Janice A. Milton	128

Short Communications

The Sextanid meteor stream. By C. S. Nilsson	158
------------------------------------------------------	-----

NUMBER 2, JUNE 1964

	PAGE
Complex singularities in production amplitudes. By J. Cunningham	161
The evolution of massive stars initially composed of pure hydrogen. By R. Van der Borcht	165
Collision broadening in the inversion spectrum of methyl chloride at pressures up to two atmospheres. By C. H. Burton, W. B. Lasich, J. H. Noon, and R. W. Parsons	175
The effect of wave-damping on the surface velocity of water in a wind tunnel. By L. M. Fitzgerald	184
Quiet day solar magnetic variations at Toolangi, Victoria. By D. E. Winch and L. Slaucitajs	189
Remarks on the efficiencies of Geiger, proportional, and scintillation counters with application to the absolute intensity of characteristic X-radiation. By V. Metchnik	200
A southern hemisphere radio survey of meteor streams. By C. S. Nilsson ..	205

Short Communications

Sodium layer heights over Antarctica. By G. R. Cresswell	257
------------------------------------------------------------------	-----

NUMBER 3, SEPTEMBER 1964

	PAGE
Statistical mechanics of almost one-dimensional systems. II. By J. A. Barker	259
Anharmonic contributions to the vibratory free energy of a lattice. By P. Lloyd	269
The motion of charged particles in the vicinity of magnetic neutral planes with applications to type III solar radio bursts. By A. A. Weiss and J. P. Wild	282
The diffusion of electrons in dry, carbon dioxide free air. By J. A. Rees and R. L. Jory	307
Diffusion of meteor trails in the Earth's magnetic field. By J. L. A. Francey	315
Fan-beam observations of radio sources at 21 cm wavelength. By N. R. Labrum, T. Krishnan, W. J. Payten, and E. Harting	323
The Parkes catalogue of radio sources, declination zone -20° to -60° . By J. G. Bolton, F. F. Gardner, and M. B. Mackey	340
Diurnal variations in the power spectrum and polarization of telluric currents at conjugate points, $L = 2.6$. By K. B. Mather, E. J. Gauss, and G. R. Cresswell	373
Average radiation-pressure forces produced by sound fields. By W. E. Smith	389
Radial velocities associated with selected emission nebulae in the Small Magellanic Cloud. By B. J. Bok, H. Gollnow, J. V. Hindman, and M. Mowat	404
Geomagnetic and ionospheric effects at Brisbane following the nuclear explosion on July 9, 1962. By G. G. Bowman and J. S. Mainstone	409

Short Communications

Sodium chloride sensitizing of far ultraviolet spectrum plates. By K. M. Burrows, J. C. Kelly, and D. E. Ellis	418
Photoneutron angular distributions from lead and bismuth. By F. R. Allum, T. W. Quirk, and B. M. Spicer	420

NUMBER 4, DECEMBER 1964

	PAGE
Transient heat conduction between a sphere and a surrounding medium of different thermal properties. By J. R. Philip	423
Gauge-independent theory of symmetry. I. By L. J. Tassie and H. A. Buchdahl	431
Integral equations for three-particle interaction amplitudes in the non-relativistic case. By V. V. Komarov and Anna M. Popova	440
Dislocation substructures in deformed and recovered chromium. By A. C. McLaren	447
Calculations of intensities of emission of characteristic X-radiation. By S. G. Tomlin	452
Measurements of Townsend's energy factor k_1 for electrons in carbon dioxide. By J. A. Rees	462
Volcanic particles in the stratosphere. By Beverley Harris	472
Ionospheric irregularities and high-multiple reflections. By G. G. Bowman ..	480
Preliminary results of observations of aspect-sensitive reflections from irregularities in the F' region. By Evelyn M. Swenson	490
Vela-Puppis meteor shower activity. By C. D. Ellyett and K. W. Roth ..	505
21 cm hydrogen-line survey of the Large Magellanic Cloud. I. Stellar, nebular, and neutral hydrogen radial velocities. By R. X. McGee	515
The temperature dependence of the elastic constants of a lattice. By P. Lloyd	524
The allowed and forbidden transitions in the paramagnetic resonance of the manganese ion in trigonal sites in apatite and smithsonite. By S. P. Burley	537
Paramagnetic resonance of Cu^{2+} and Ti^{3+} ions in borax beads. By S. P. Burley	543

Short Communications

Motion of a charged particle in a non-uniform magnetic field. By R. F. Mathams	547
Inelastic collisions for small momentum transfers. By J. Cunningham ..	553
Axial ratio of the projected polarization ellipse. By the late S. Ramu ..	556
Corrigenda	558
Index to Volume 17	559
