*Introducing the next generation
 of HTDEM technology*

New Resolution Geophysics (NRG™) has developed the Xcite™ system, a new generation of helicopter-borne time-domain electromagnetic (HTDEM) systems by incorporating the latest new-age, high speed electronics and sophisticated aeronautical engineering. Xcite™ is now commercially available for survey and provides an unparalleled alternative to existing HTDEM technologies for the minerals exploration and geoscience mapping community.

Features of the system include:

- Innovative patented loop design
- Exceptional signal/noise
- Logistically superior in setup and shipping
- Excellent depth of investigation
- Performance in both early and late time
