EDITORIAL POLICY

The Royal Society of Victoria disseminates new scientific knowledge and encourages scientific debate through the medium of its international journal, *Proceedings of the Royal Society of Victoria*, in which peer-reviewed original research articles, review articles, and short communications in all areas of science; and articles for the Transactions section of our journal that undergo editorial review are published.

The ‘Proceedings’ consists of papers that are reviewed by two reviewers and, in the cases of widely divergent reviewer opinions, a third reviewer may be consulted. The editor’s decision, through the Editorial Committee, as to the acceptance or rejection of a submitted or reviewed contribution, is final.

The ‘Transactions’ consists of items of scientific interest such as occasional addresses, articles of debate or discussion or other contributions deemed appropriate by the editor and in the scientific interest of our members. The responsibility of the content of such contributions rests solely with the author.

The Society invites contributions for the Proceedings from authors across the various disciplines of science and on issues concerning technology and the applied sciences.

Honorary Editor: Mary Familiari
Managing Editor: Natalie Korszniak
