Summary v
About the authors ix
Acknowledgements xi
About our sponsors xiii

1. Introduction 1
   The Australian mammal fauna and its fate 1
   Aims of this action plan 3
   Methods and definitions 3
   Distributional database and mapping 6
   Information base 7
   Template for accounts for individual taxa 7
   Consequences of status assigned here 13

2. A list of native Australian mammal species and subspecies 15
   A.A. Burbidge, M.D.B. Eldridge, C. Groves, P.L. Harrison, S.M. Jackson, T.B. Reardon, M. Westerman and J.C.Z. Woinarski
   Introduction 15
   Rationale for taxonomic treatments used in this Action Plan 16
   Working list of native Australian mammal species and subspecies 27

3. Evaluation of taxa that have been translocated to islands and ‘mainland islands’ 33
   Introduction 33
   Assisted colonisation and red list evaluations 35
   Conclusions 35
   Acknowledgements 36

4. Conservation status assigned to all Australian mammal species and subspecies 37
   Listing of accounts provided for ‘Not Evaluated’ taxa 49

5. Taxon profiles 51

6. Analysis: the status and trends of Australian mammals 859
   Tallies of conservation status 859
   Comparisons with current IUCN and EPBC Act status 862
   Trends in conservation status 864
   Threats 867
   Research and management 879
   Recovery planning 879
   Monitoring 880
   Geographic pattern 882
   Islands 882
7. Conclusions

Appendix A. Accounts for taxa that are Not Evaluated

Appendix B: Calculation of taxonomic distinctiveness scores for species and subspecies
