

# AUSTRALIAN SYSTEMATIC BOTANY

An international journal devoted to the taxonomy, biogeography  
and evolution of all plant groups

---

**Contents**   Volume 25   Issue 5

10 October 2012

Flower biology and subspecies concepts in *Micropholis guyanensis* (Sapotaceae):  
evidence of ephemeral flowers in the family

Mário Henrique Terra-Araujo, Aparecida Donisete de Faria,  
José Eduardo Lahoz da Silva Ribeiro and Ulf Swenson   295–303

A taxonomic review of *Triodia bunicola* and *T. scariosa* (Poaceae: Chloridoideae), based  
on morphological and molecular data

Charlotte R. Hurry, Neville G. Walsh and Daniel J. Murphy   304–312

Phylogeny and proposed circumscription of *Breynia*, *Sauropus* and *Synostemon*  
(Phyllanthaceae), based on chloroplast and nuclear DNA sequences

Kanchana Pruesapan, Ian R. H. Telford, Jeremy J. Bruhl and Peter C. van Welzen   313–330

Phylogenetic relationships in Loganieae (Loganiaceae) inferred from nuclear ribosomal  
and chloroplast DNA sequence data

Kerry L. Gibbons, Murray J. Henwood and Barry J. Conn   331–340

Molecular phylogeny and systematics of *Prostanthera* (Lamiaceae)

Trevor C. Wilson, Barry J. Conn and Murray J. Henwood   341–352

Phylogenetic analysis of Australian species of *Veronica* (*V.* section *Labiatooides*; Plantaginaceae)

Dirk C. Albach and Barbara G. Briggs   353–363

*Cassytha pubescens* and *C. glabella* (Lauraceae) are not disjunctly distributed between Australia  
and the Ryukyu Archipelago of Japan – evidence from morphological and molecular data

Goro Kokubugata, Koh Nakamura, Paul I. Forster, Gary W. Wilson, Ailsa E. Holland,  
Yumiko Hirayama and Masatsugu Yokota   364–373
