Table S1. *P*-value of variance analysis of models (with linear/log-linear response functions) explaining the price of a) driven shooting hunts and b) walked-up shooting hunts. We present *P*-values of the models.

	Hunters	Landscape	Releases	Rabbit
a) Models - driven shooting				
	0.565/0.588	0.740/0.757	-	-
	0.311/0.310	-	-	-
	-	0.529/0.529	-	-
b) Models - walked-up shooting
