CONTENTS

BUSINESS
Reducing cost of CCUS associated with natural gas production by improving monitoring technologies
M. Bagheri, S. Ryan, D. Byers and M. Raab

Smashing the stigma in mental health – a strategic blueprint for change
A. Feringa and N. Wentzel

NORM inventory forecast for Australian offshore oil and gas decommissioned assets and radioactive waste disposal pathways
S. McKay, S. A. Higgins and P. Baker

Lessons from 5 years of GISERA economic research
T. G. Measham, R. Marcos-Martinez, L. Poruschi and D. Fleming-Muñoz

Identifying pan-industry common contributors to major accident events
J. Mitchell and A. Turnbull

Reconciling the marriage of renewables and gas in the Australian energy market
J. Stabler

ENGINEERING
Coal fracturing through liquid nitrogen treatment: a micro-computed tomography study

Innovative digital inspection methodology
S. A. Anderson

Impact of downward releases on the risk profile in hydrocarbon process plants
F. Askari, C. Crowley and H. Kord

A novel approach for using silica nanoparticles in a proppant pack to fixate coal fines

Mercury partitioning in oil and gas production systems – design optimisation and risk mitigation through advanced simulation
P. Crafts and M. Williams

Revolutionising confined space safety management: a case study
E. Daher and D. W. Dowd

Wettability measurements on two sandstones: an experimental investigation before and after CO₂ flooding
C. A. Fauziah, E. A. Al-Khdheewi, A. Barifcani and S. Iglauer

Deep net simulator (DNS): a new insight into reservoir simulation
S. Ghassemzadeh, M. Gonzalez Perdomo, M. Haghighi and E. Abbasnejad

The role of carbon nanotubes (CNTs) and carbon particles in green enhanced oil recovery (GEOR) for Arabian crude oil in sandstone core

The role of supercritical CO₂ in gas well health issue – liquid loading

Auto-control model building using machine learning regression for extreme response prediction
D. Leong and A. Bahuguni
Impact of the stress state and the natural network of fractures/faults on the efficiency of hydraulic fracturing operations in the Goldwyer Shale Formation
P. P. Mandal, R. Rezaee and J. Sarout
163–183

A comparison of fractal methods for evaluation of hydraulic fracturing surface roughness
A. Movassagh, X. Zhang, E. Arjomand and M. Haghighi
184–196

Application of machine learning methods to assess progressive cavity pumps (PCPs) performance in coal seam gas (CSG) wells
F. Saghir, M. E. Gonzalez Perdomo and P. Behrenbruch
197–214

Digital innovation in subsea integrity management
R. Thethi, D. Vadel, M. Haning and E. Tellier
215–226

Performance evaluation of synthetic and natural polymers in nitrogen foam-based fracturing fluids in the Cooper Basin, South Australia
T. Tran, M. E. Gonzalez Perdomo, K. Wilk, P. Kasza and K. Amrouch
227–241

GEOSCIENCE
The Hayfield Sandstone Play: the characterisation of a Mesoproterozoic sourced, Proterozoic sandstone reservoired, tight oil and gas play in the Beetaloo Sub-basin
C. Altmann, B. Richards, A. Côté, C. Bein, E. Baruch-Jurado and L. Jenkinson
242–266

Implications of accurate geomechanical modelling and systematic core testing for sanding evaluation and sand control decisions – a case study from Perth Basin
S. Asadi, A. Khaksar, M. Fabian, R. Xiang, D. N. Dewhurst and C. Delle Piane
267–281

Technical de-risking of a demonstration CCUS project for final investment decision in Australia
282–295

A new concept for the extraction of gas from Permian ultra-deep coal seams of the Cooper Basin, Australia: Expanding Reservoir Boundary Theory
E. C. Dunlop
296–314

Elastic waves in porous media saturated with non-wetting fluid
J. X. Li, R. Rezaee, T. M. Müller and M. Sarmadivaleh
315–325

Creating a 3D image from 2D data using structurally conformable interpolation: a case study from the Beagle Sub-basin, NSW, Australia
S. Notiyal and V. Seesaha
326–334

Multi-isotope studies investigating recharge and inter-aquifer connectivity in coal seam gas areas (Qld, NSW) and shale gas areas (NT)
335–347
