

Volume 63 Supplement 1: Conference Proceedings 2023

CONTENTS

2022 - YEAR IN REVIEW

Exploration and appraisal year in review 2022

Adam Craig S1–S13

PESA Australia Business Environment Review 2022

Erin Wild S14–S25

Development and production review 2022

Martin Wilkes S26–S31

BUSINESS, ENVIRONMENT, SAFETY AND GOVERNANCE

Measuring change in the race to deliver net zero

Clare Anderson, Paul Ebert and Chris Greig S32–S35

Combating modern slavery in Australian supply chains: a case study of a holistic approach

Judy Auld and Sophie Ryan S36–S39

Seeing sustainability reporting through a lens of value creation

Katelyn Bonato S40–S43

An industry business case for diversity, equity, and inclusion

Cynthia Calderon S44–S46

Maintenance planning innovation: realising planning and execution efficiencies through process and digital transformation

Melinda Clarke and Darrshan Clarke S47–S51

Creating culturally responsive and safe workplaces for the advancement of First Nations people

Byron Davis S52–S56

Protecting whistle-blowers – addressing misconduct and inappropriate behaviour in the workplace

Shane Enriken and Vince Hughes S57–S59

The road to integrated operations

Shawn Fernando S60–S63

The importance of STEM

Jillian Formentin S64–S67

Integrated team approach to decommissioning Environment Plan development

Jessica Harvey S68–S72

Benchmarking Corporate Resilience and Sustainability – a framework for assessing corporate positioning in the face of uncertainty and risk

Andrew Harwood S73–S76

Oil, gas and new energy: how to transform holistically for a more efficient and sustainable future

Scott Hastie and Tim Wall S77–S81

Integrating Sustainability into your value stream

Richard Kydd and Tim Wall S82–S86

(Continued)

Cumulative impact assessments – its relevance for Australia’s energy transition <i>Ashlyn Miller</i>	S87–S90
Collaborative Seismic Environment Plan (CSEP) project – a long-term, consistent, consortium-based approach to environmental approvals <i>Simon Molyneux, Samantha Jarvis, Shane O’Donoghue, Paul Miller and Tim Duff</i>	S91–S95
The human side of transition – putting people at the heart of energy transformation so no-one gets left behind <i>Louise Pogmore and Benn Wheeler</i>	S96–S100
Delivery through adversity: the planning and execution of Beach Energy’s multi-year Offshore Otway Program <i>Jason Storey, David Ross, Mike Zambonini and Sergio Di Prinzio</i>	S101–S104
The 12 Pillars model of ESG: bringing practical clarity to ESG across the Australian gas industry <i>Jen Thompson and Matt Colquhoun</i>	S105–S108
Are all contingent resources equal? A short history of outcomes in contingent resources bookings <i>Katarina Van Der Haar</i>	S109–S112
Environmental benefits of leaving steel-piled jacket platforms in place <i>Sheela Veluayitham, Louise Mayboehm and Katie Martin</i>	S113–S116
Mental health, psychological safety and psychosocial safety – same but different? <i>Nada Wentzel</i>	S117–S120
EFFICIENT MARKETS	
New partnering principles on the path to net zero <i>Bradley Farrell</i>	S121–S124
Transition to tolling third-party gas at Karratha Gas Plant: an attractive investment which unlocks infrastructure utilisation <i>Tom Lukatela and Holly Thomas</i>	S125–S128
Lessons from the energy crisis of an energy exporter <i>Kaushal Ramesh</i>	S129–S133
The rising influence of ex-region fundamentals on Asian LNG prices <i>Kaushal Ramesh</i>	S134–S137
A geopolitical nightmare: the battle of energy security and the energy transition <i>Daniel Toleman, Lucy Cullen and Gavin Thompson</i>	S138–S141
ENGINEERING	
Tiny trains – new hope? Or the same issues in a smaller box? <i>Andy Aston</i>	S142–S145
Connecting a digital path from plan to execution to enhance efficiency <i>Abhijit Barhate and Bjørn Audun Schibevaag</i>	S146–S150
Woodside offshore dry deluge testing <i>Katy Bastani</i>	S151–S154
Development of a novel Passive Fire Protection system – Humidur Char <i>Michael Brameld and Travis Baensch</i>	S155–S158
Sense, Insight, Action – Woodside’s Intelligent Asset Journey <i>Leon Burgin and Lauchlan Wallace</i>	S159–S163

(Continued)

Transient modelling of water condensation rate for top of line corrosion <i>Diwu Chen, Shane A. Morrissy and Adam Mackenzie</i>	S164–S168
Digital advanced work packaging – a case study in construction-led delivery <i>Bradley Copeland</i>	S169–S172
Engineered flowback and reservoir evaluation for unconventional wells <i>Andrew Fontenot and Chau Nguyen</i>	S173–S176
Fines migration during coal bed methane production: mathematical and laboratory modelling, field cases <i>Abolfazl Hashemi, Bryant Dang-Le, Cuong Nguyen, Grace Loi and Nastaran Khazali</i>	S177–S182
A novel method for simultaneous determination of relative permeability and capillary pressure from corefloods (gas/CO ₂ –water systems) <i>Nassim Hemmati, Sara Borazjani, Alexander Badalyan, Luis Genolet, Aron Behr, Abbas Zeinijahromi and Pavel Bedrikovetsky</i>	S183–S187
Bridging the gap: improving integration between duty holders involved in well operations <i>Claire Hick, Mark Bourne, Tom Barratt and Derrick O’Keeffe</i>	S188–S191
Challenges and lessons learnt from Northern Territory (NT) Orphan Well project <i>Shaun Hingerty</i>	S192–S197
Sanding evaluation and real-time sand management decisions in high-rate gas wells, Ichthys Field, Browse Basin Australia <i>Abbas Khaksar, Ahmadreza Younessi and Inyau Bada</i>	S198–S203
Unmanned rotating equipment for normally unattended installations <i>Alessandro Leto, Adolfo Agresta, David Bartolini, Gionata Ruggiero and Daniele Porciani</i>	S204–S208
GEOSCIENCE	
Australia’s Onshore Basin Inventories – foundational knowledge synthesis for better design of precompetitive data acquisition <i>Adam H. E. Bailey, Lidena K. Carr and Russell Korsch</i>	S209–S214
Cretaceous depositional environment interpretation of offshore Otway Basin cores and wireline logs; application to the generation of basin-scale gross depositional environment maps <i>Chris Cubitt, Steve Abbott, George Bernardel, Merrie-Ellen Gunning, Duy Nguyen, Chris Nicholson and Alan Stoa</i>	S215–S220
The distribution and morphology of Late Jurassic to Early Cretaceous igneous intrusions in the Northern Carnarvon Basin <i>Michael Curtis, Simon Holford, Mark Bunch, Nick Schofield and Alex Karvelas</i>	S221–S226
Rapid history matching of petroleum production from well logs and 4D seismic via Machine Learning techniques in the Norne Field, offshore Norway <i>Jones Ebinesan, Greg Smith and Ritu Gupta</i>	S227–S231
Maximising production from the Gippsland Basin: integrating subsurface datasets across multiple disciplines to increase domestic gas supply <i>Adam Fynnaart, Natalie Debenham, Arun Kumaravel, Kieran Trump and Angus Goody</i>	S232–S236
New 3D seismic imaging of Late Cretaceous extrusive volcanics in the deep-water Gippsland Basin: implications and insights for paleo-depositional environments and petroleum systems <i>Jarrad Paul Grahame</i>	S237–S242
The Cretaceous-Cenozoic volcanic record of the Gippsland Basin: origin, nature and significance for the energy transition <i>Simon Holford, Fun Meeuws, Ernest Swierczek, Nick Schofield and Mark Bunch</i>	S243–S246

(Continued)

Preservation of thermal signature of elevated syn-rift heat flow during multiphase extension: a case study from the Duntroon Sub-basin, Great Australian Bight <i>Simon Holford, Ian Duddy, Paul Green, Nick Schofield, Richard Hillis and Martyn Stoker</i>	S247–S250
Underexplored but not forgotten: assessing the energy resources potential of the greater Pedirka Basin region through play-based mapping <i>Jeremy Iwanec, Paul Strong and Tom Bernecker</i>	S251–S256
Stepping off the edge: the geological framework of deepwater northern Australia <i>Ciaran Lavin, Angus Goody and Ian Longley</i>	S257–S262
Thermal history of the Carrara Sub-basin: insights from modelling of the NDI Carrara 1 drill hole <i>Tehani J. Palu, Emmanuelle Grosjean, Liuqi Wang, Christopher J. Boreham and Adam H. E. Bailey</i>	S263–S268
Geophysical characterisation and improved delineation of coaly source rocks from integrated analysis of laboratory, well and seismic data <i>Tusar R. Sahoo, Richard Sykes, Ludmila Adam and Robert H. Funnell</i>	S269–S274
Rapid play evaluation through AI interpretation <i>Jacob Smith and Peter Szafian</i>	S275–S279
Petrophysical properties of igneous rocks in continental rift basins – a case study from the Mesozoic sequence of the Browse Basin, North West Shelf of Australia <i>Kosuke Tsutsui, Simon Holford, Mark Bunch, Rosalind King, Ken McClay and Nick Schofield</i>	S280–S285
HEALTH, SAFETY, ENVIRONMENT AND PERFORMANCE	
Proppant powder – the protection and the pain – lurking hazards of silicosis <i>Chris Barrand, Radika Lucas and Anne Nissen</i>	S286–S290
Decoding decommissioning requirements when using new technology – Queensland’s petroleum wells code of practice <i>Chris Barrand and Radika Lucas</i>	S291–S295
Beyond the TRIFR – maintaining safe operations with a TRIFR of zero <i>Andy Bull</i>	S296–S300
Engineering the safety culture in late-life assets <i>Tom Coolican</i>	S301–S303
Decommissioning and restoration (D&R) timing: is later always better? <i>Andrew Duncan</i>	S304–S308
Do we know enough to make future-proofed decisions about contaminants when decommissioning offshore oil and gas infrastructure? <i>Darren J. Koppel, Francesca Gissi, Ibukun Oluwoye and Tom Cresswell</i>	S309–S314
Minimising the burden of hazardous area inspections <i>Iain MacKenzie, Bruce Hill and Sakeena Dawood</i>	S315–S317
Where to from here for Australian decommissioning <i>Francis Norman</i>	S318–S320
Environmental considerations around <i>in-situ</i> decommissioning of oil and gas pipeline infrastructure in marine environments <i>Anam Saeed, Bethan Parnum and Michael Fichera</i>	S321–S324
National Decommissioning Research Initiative (NDRI) phase 2 determining outcomes to inform offshore decommissioning options <i>Cassandra Schmidt and Luke Smith</i>	S325–S327

(Continued)

Better together – cooperative incident response testing and exercising – <i>Exercise Zephyr ‘22</i> <i>Phillip Starkins</i>	S328–S331
Improving process safety for the operation of Major Hazard Facilities <i>Erik Vandenberg</i>	S332–S336
LOW EMISSIONS ENERGY AND TECHNOLOGY	
Opportunities for CO ₂ utilisation in the Northern Territory <i>Dominic Banfield, Anthea Moisi, Vidip Arora and Doug Palfreyman</i>	S337–S340
Carbon dioxide-enhanced oil recovery in Australia – techno-economic evaluation, carbon dioxide source/sink networks and current policy landscape <i>David Bason, Hadi Nourollah, Vello Kuuskraa, Matt Wallace, Tim Duff and Matthias Raab</i>	S341–S346
Re-purposing onshore and offshore infrastructure for CCUS in Gippsland <i>Alan Black and Xavier Duthie</i>	S347–S350
Modelling of hydrogen gas generation from overmature organic matter in the Cooper Basin, Australia <i>Christopher J. Boreham, Dianne S. Edwards, Andrew J. Feitz, Andrew P. Murray, Nicolaj Mahlstedt and Brian Horsfield</i>	S351–S356
Conversion of offshore hydrocarbon facilities for use in carbon capture and storage – challenges and solutions <i>Nick Brown and Ross Weiter</i>	S357–S360
Towards 2030: transforming asset emissions in Australian production operations <i>Peter Carydias and Preben Nielsen</i>	S361–S366
Investigating the potential for a blue carbon economy on Australia’s northern coastline <i>B. W. Davis, R. A. Groom, C. J. Carle, L. B. Hutley, C. Lovelock and J. Perry</i>	S367–S370
Upscaling CCUS in Asia Pacific – a look at upstream synergy projects and potential for multi-user hubs <i>Antonio Dimabuyu</i>	S371–S374
Including sub-surface uncertainties in CCS hub investment decision making – a case history <i>Andrew Garnett, Iain Rodger and Joe Lane</i>	S375–S378
Success factors in the creation of a CCS Hub <i>Phil Grainger and Steve Ovenden</i>	S379–S381
Improving energy efficiency during LNG plant turndown operation <i>Michael Hanlin and Matthew Ladner</i>	S382–S385
Integration of the comprehensive Gorgon CO ₂ surveillance program for history matching of the Dupuy reservoir model <i>Andrew Haynes, Karl Jager, Jessica Maekivi, Leigh Scoby-Smith and Trent Shawcross</i>	S386–S390
Australia’s regulation of scope 3 emissions <i>Matthew Holding</i>	S391–S394
Regulation of the Australian carbon capture and storage industry <i>Matthew Holding</i>	S395–S398
Developing a ‘fit for purpose’ approach to managing methane emissions <i>Ian Joynes, Mark Wittwer and Yvette Manolas</i>	S399–S403
Integrating underground gas storage experience for CCS optimisation <i>Zis G. Katelis and William J. Askham</i>	S404–S408
Integrated system design for the Moomba CCS Project <i>Phillip Lemon</i>	S409–S412

(Continued)

Enabling decarbonisation through the supply chain <i>Tim McCarthy and Mark Goodacre</i>	S413–S418
Carbon capture and storage’s role within Australia’s energy transition: necessary, safe, and reliable <i>Matthias Raab and Geoffrey O’Brien</i>	S419–S422
The global status of carbon capture and storage: ambition to action <i>Nabeela Raji, Chris Consoli, Matt Steyn and Ian Havercroft</i>	S423–S427
Under the loupe: the case for carbon-offset LNG from Australia <i>Kaushal Ramesh and Sally Bogle</i>	S428–S433
The gold standard for Australian oil and gas corporations to report credible methane emissions <i>Helen Riordan and Kane Annesley</i>	S434–S437
Can Australia create ‘super’ basins? <i>Angus Rodger and Anne Forbes</i>	S438–S441
End to end emissions monitoring by digitalisation <i>Alexander Roskoss</i>	S442–S445
The Northern Territory low-emissions carbon capture, utilisation and storage hub development – the collaborative business case development <i>Andrew Stuart Ross, Matthew Ironside and Ryan Gee</i>	S446–S449
Energy transition risk for Australia’s LNG: how to build up resilience for a low-carbon future <i>Olga Savenkova</i>	S450–S454
Greenhouse gas emissions tracking: making it count <i>Fabio Terzini and Esther Hayes</i>	S455–S459
Towards building a successful CCS hub in Darwin <i>Alister Trier, Howard Smith, Aiden Anderson-Barr and Simon Flowers</i>	S460–S463
Opportunity of the future: hydrogen as fuel and feedstock <i>Matthew Walden, Senjit Sarkar, Samuel Mugford and Thomas Wood</i>	S464–S467
Carbon capture and storage – a safe and reliable monitoring and verification plan developed using oil and gas industry core skill sets <i>Anthony Western</i>	S468–S472
The surface challenges of underground hydrogen storage – pre-feasibility studies at the Otway International Test Centre, Victoria <i>David Whittam, Jai Pandit, Kwong Soon Chan, Max Watson and Matthias Raab</i>	S473–S477
The framework and practice of CO ₂ storage resources evaluation: Santos Moomba CCS Project CO ₂ storage resources assessment <i>Chad Wilson, Shane Hattingh, Doug Peacock and Tony Zhang</i>	S478–S482
Implementing SRMS in the North Perth Basin: challenges and practical solutions <i>HongFeng Wu, William Walton, Hesham Farhani, Pooya Hadian and Kiong Hooi (Steven) Lee</i>	S483–S487
