Review
Prospects for the utilisation of cocoyam corm meal in poultry feeding
S. S. Diarra 603–609

Nutrition and Metabolism
Managing plasma P concentrations in beef heifers with a slow release vitamin D supplementation
N. W. Tomkins, R. Elliott, J. J. McGrath and T. Schatz 610–617
Dietary supplemental chromium and niacin influence the growth performance and fat deposition in lambs
K. Hashemian, M. A. Norouzian and A. Mohammadi-Sangcheshmeh 618–624
Use of Bacillus subtilis PB6 enriched with choline to improve growth performance, immune status, histological parameters and intestinal microbiota of broiler chickens
Katarzyna Abramowicz, Magdalena Krauze and Katarzyna Ognik 625–634

Feed Quality, Nutritional Value and Toxicology
In vivo digestibility of a range of silages in cattle compared with sheep
K. L. Bailes, J. W. Piltz and D. M. McNeill 635–642
Temporal variations in leaf traits, chemical composition and in vitro true digestibility of four temperate fodder tree species
Simone Ravetto Enri, Massimiliano Probo, Manuela Renna, Eleonora Caro, Carola Lussiana, Luca M. Battaglini, Giampiero Lombardi and Michele Lonati 643–658
In vitro rumen gas production kinetics, hydrocyanic acid concentration and fermentation characteristics of fresh cassava root and feed block sulfur concentration
Gamonmas Dagaew, Anusorn Cherdthong, Metha Wanapat and Pin Chanjula 659–664
Methane emission, ruminal fermentation parameters and fatty acid profile of meat in Santa Inês lambs fed the legume macrotiloma
Paulo de Mello Tavares Lima, Adibe Luiz Abdalla Filho, Juliano Issakowicz, Egon Hion Ieda, Patricia Spoto Corrêa, Waldssimiler Teixeira de Mattos, Luciana Gerdes, ConceptaMcManus, Adibe Luiz Abdalla and Helder Louvandini 665–673

Biosecurity and Health
Understanding farmers’ biosecurity beliefs and behaviours related to antimicrobial resistant bacteria in Michigan, USA
Jessica D. Garcia, Andrew G. Huff and Emily S. Huff 674–682

Production Systems, Environment and Management
The economics of phosphorus supplementation of beef cattle grazing northern Australian rangelands
Production and quality of the silage of sorghum intercropped with Paiaugas palisadegrass in different forage systems and at different maturity stages
Suelen Soares Oliveira, Kátia Aparecida de Pinho Costa, Wender Ferreira de Souza, Charles Barbosa dos Santos, Daniel Augusto Alves Teixeira and Victor Costa e Silva 694–704

Production Systems in Transition
Variant forms of qualitative traits of indigenous chickens reared under extensive system in Tolon District, Ghana
Peter T. Birteeb and Thomas Boakye 705–712
**Meat Science and Product Quality**

Effects of aging and dietary supplementation with polyphenols from *Pinus taeda* hydrolysed lignin on quality parameters, fatty acid profile and oxidative stability of beef

Castration age and growth, meat production and meat quality of Nellore male cattle
