Spermatozoa, fertility in rabbits inseminated with diluted or washed ..	181	Ting, Shirley W.—	
<i>Stachybotrys atra</i> , linked induction of glycosidases in	1291	<i>See</i> Bogyo, T. P.	45
Stephenson, Elsie M.—		Tobacco plant, leaf growth and development in	855
Temperature tolerance of cultured amphibian cells in relation to latitudinal distribution of donors ..	741	Toepfer, J. R.—	
Stone, B. F.—		<i>See</i> Gesinski, R. M.	1319
Brain cholinesterase activity and its inheritance in cattle tick (<i>Boophilus microplus</i>) strains resistant and susceptible to organophosphorus acaricides	321	<i>Trifolium subterraneum</i> , cation effects on phosphate absorption from solution by	1
Inheritance of resistance to organophosphorus acaricides in the cattle tick, <i>Boophilus microplus</i>	309	Vorobiev, L. N.—	
Stone fruits, gibberellin and growth in Subterranean clover, effect of phosphorus and zinc levels in the substrate on ⁶⁵ Zn distribution in	619	<i>See</i> Coster, H. G. L.	1069
Sultana berry, observations on gas exchange in	907	Wales, R. G., and O'Shea, T.—	
Surman, P. G.—		Deep freezing of rabbit spermatozoa	831
Cytology of "pink-eye" of sheep, including a reference to trachoma of man, by employing acridine orange and iodine stains, and isolation of <i>Mycoplasma</i> agents from infected sheep eyes	447	Fertility in rabbits inseminated with diluted or washed spermatozoa ..	181
Syriatowicz, J. C.—		Wales, R. G.—	
<i>See</i> Coster, H. G. L.	1069	<i>See also</i> Restall, B. J.	491
Taxonomy (fungal), electrophoretic patterns of oxidoreductases and other proteins as criteria in	275	Wallace, H. R.—	
Taylor, R. H., and Smith, P. R.—		<i>See</i> Collis-George, N.	21
The relationship between bean yellow mosaic virus and pea mosaic virus ..	429	Weller, R. A., Gray, F. V., and Pilgrim, A. F.—	
Taylor, R. H., Smith, P. R., Reinganum, C., and Gibbs, A. J.—		Volatile fatty acids produced by a sheep fed pure cellulose as sole carbohydrate in its diet	1075
Purification and properties of broad bean wilt virus	929	Weston, R. H.—	
Teakle, D. S.—		<i>See</i> Hogan, J. P.	1263
Sowbane mosaic virus infecting <i>Chenopodium trigonon</i> in Queensland ..	649	Wheat, chromosome pairing in a nulli-5B di-5D haploid	161
Tetanus toxin and toxoid, studies on. II	559	Wheat flour, characterization by gel electrophoresis of the proteins extracted by dilute alkali from	1053
Thompson, E. O. P.—		Wheat flour on Sephadex columns, fractionation of the nitrogen compounds of	1077
<i>See</i> Hosken, R.	593	Wheat plant, physiology of growth in. IV	835
<i>See</i> O'Donnell, I. J.	385	Wheat, synthesis of starch in detached ears of	597
Thomson, J. A.—		White, I. G.—	
<i>See</i> Kinnear, Judith F.	1033	<i>See</i> Murdoch, R. N. 111, 123, 483, 961, 973	
		<i>See</i> Quinn, P. J.	133, 781
		Williams, C. N.—	
		<i>See</i> Williams, R. F.	835
		Williams, R. F., and Williams, C. N.—	
		Physiology of growth in the wheat plant. IV. Effects of day length and light-energy level	835
		Williams, the late D.—	
		<i>See</i> Alexander, G.	953

	PAGE		PAGE
Williams, V. J., Hutchings, T. R., and Archer, K. A.—		Wool, low-sulphur proteins of, methionyl sequences in	593
Absorption of volatile fatty acids from the reticulo-rumen and abomasum of sheep	89	Wool, low-sulphur proteins of, pyrrolid-2-one-5-carboxylic acid as an <i>N</i> -terminal group of	1327
Willing, R. R.—		Wool proteins, high-sulphur, effect of reduction of the disulphide bond on the fluorescence of	1325
See Paton, D. M.	157	Wool proteins, immunological studies on	815
Wills, R. B. H., and Scott, K. J.—		Wool, studies on reduced. VIII	385
Relation between low-temperature breakdown and the volatiles given off by individual apples	1307	Wool, the chemical composition of. V	375
Woodlock, Anne F., and Harrap, B. S.—			
The effects of salts on the stability of the collagen helix under acidic conditions	821	Yates, J. R.—	
Wool fibres, reduced, their preparation and alkylation	805	Studies in depilation. II. Structural changes in the wool follicle during bacterial wool loosening ("sweating")	361
Wool follicle, structural changes in, during depilation by bacterial wool loosening	361	IV. Structural changes in the wool follicle during depilation with alkali and alkaline reducing systems	795
Wool follicle, structural changes in, during depilation with acid and enzyme systems	1249	VII. Structural changes in the wool follicle during depilation with acid and enzyme systems	1249
Wool follicle, structural changes in, during depilation with alkali and alkaline reducing systems	795	<i>Zea mays</i> , short-term growth response to growth regulators in roots of	201
