Supplementary Table 1. Assessment of cultivars and landraces associated with low and high Cd content based on molecular and analytical analysis.

This table shows the genotyping of the durum wheat panel and reflects the accuracy of grain cadmium contents with three different molecular markers and the grain cadmium contents with biochemical analysis. This table successfully showed the association of phenotypic and genotypic data for each durum wheat cultivar/genotype

No	Name	usw47	Cad-5B	KASPar	Grain Cd concentration (µg/kg)
