Information reproduced from Dawson \textit{et al.} (2017a).
**Fig. S2.** Boxplot showing the number of flood events for the sites in each field. Floods were recorded from the 32 events that occurred in the 25 years before soil collection (Dawson et al. 2017b). ***,** \( P > 0.001 \) for the difference between the Clear. 2003 field and all other fields, by a Tukey HSD test. The differences between the other fields were not significant.
