Table S1. Approach applied to determining biophysical indicators of BCI including storage, preservation, generation and permanency within estuaries.

BCI component	Geomorphic indicator	Description of indicator	Cell label (value)	Cell description
Storage	Elevation, geology (sedimentary and bedrock)	Mature estuaries have larger volume of sediment accumulated over the Holocene compared to immature estuaries	High (3)	Alluvial plain–estuarine plain + elevation 2–5 m
		Quaternary sediments in mature estuaries have more areas with low slopes (low topographic relief)	Moderate (2)	Alluvial plain–estuarine plain + elevation 0–2 m; or
		Finer grained sediments associated with alluvial and estuarine plains store more carbon than sandy sediments associated with coastal barriers	Low (1) Nil (0) High (3)	Alluvial plain–estuarine plain + elevation >5 m Coastal barrier Bedrock geology Estuarine plain sediments
Preservation	Geology (sedimentary and bedrock)	Estuarine sediments exhibits ideal anaerobic and saline conditions for carbon preservation	Moderate (2)	Alluvial plain sediments
		Alluvial sediments increasingly brackish	Low (1)	Coastal barrier sediments
		Marine sediments increasingly oxidized or reworked	Nil (0)	Bedrock geology
Generation	Elevation, geology (sedimentary and bedrock)	Lower intertidal areas support mangrove; upper intertidal areas support saltmarsh	High (3)	Quaternary deposits + elevation 0–1 m
		Saltmarsh in fluvial environments have higher generation capacity than estuarine and marine environments	Moderate (2)	Alluvial plain + elevation 1–5 m
		NB: macrophyte mapping was not used due to inconsistencies in accuracy between estuaries.	Low (1) Nil (0)	Coastal barrier–estuarine plain + elevation 1–2 m Bedrock geology
Permanency	Elevation, geology (sedimentary and bedrock)	Lower elevations and shorelines exhibit greater exposure to wave action	High (3)	Coastal barrier–estuarine plain + Elevation >5 m; or Alluvial plain
		Marine drivers exhibit history of operating near coastal and estuarine Quaternary deposits.	Moderate (2)	Estuarine plain + elevation <5 m
			Low (1) Nil (0)	Coastal barrier + elevation <5 m Bedrock geology

In combination, these factors were used to generate BCI maps.

Table S1. Approach applied to determining socio-economic indicators of blue carbon potential and to generate BCC maps.

Land-use category	Cell label (value)	Description of land-use category	Perceived implications for blue carbon
Conservation area	High (3)	Crown reserve, cultural heritage site, foreshore land, marine park, national park, nature reserve, conservation area, riparian reserve, regeneration area, state forest, state recreation area, tree lot	High conservation status and presumed high supply of ecosystem services.
Cropping	Low (1)	Continuous or rotation cropping, or with fixed irrigation system, sometimes within ephemeral wetland or lake, may include large crop areas of fodder, rice, sugar cane	Significant impact on soil, and disturbance of soil organic carbon.
Grazing	Mod. (2)	Occurs in range of landscapes including flood runners, firebreaks, agroforestry, ephemeral wetland, native vegetation, riparian land, irrigated pastures, rangelands, cleared land, and grassland	Some impact to soil structure, however, soil organic carbon likely to be affected to shallow soil depths.
Horticulture	Low (1)	Plantations of banana, bamboo, eucalypt, cut flowers, grass, nursery, olives, orchards, tea tree, tea, coffee, turf, vegetables, vineyard	Significant impact on soil, and disturbance of soil organic carbon. Land-use activity incompatible with saline substrates and likely to provide disservices.
Intensive animal production	Low (1)	Poultry, abattoirs, cattery, animal production of beef, dairy, poultry, piggery, horse studs, sale yards	Significant impact on soil, and disturbance of soil organic carbon.
Mining– quarrying	Low (1)	Derelict and abandoned mines and quarries, grassland within mining lease, mine and quarry sites, restored mining land	Significant impact on soil, and disturbance of soil organic carbon. Land-use activity incompatible with saline substrates and likely to provide disservices.
Power generation	Mod. (2)	Energy corridors, abandoned power stations, substations, gas supply, and green power	Impacts to wetland vegetation (e.g. pruning), and some impact to soil structure; however, soil organic carbon likely to be affected to shallow soil depths and low stature vegetation could be compatible.
River drainage system	Mod. (2)	Channels, estuarine waters, dams, lakes and lagoons, evaporation basins, marinas, river training, navigation structure, river channel filled with aquatic vegetation, water supply channel, weir	Potential as a carbon sink, but limited in carbon generation capacity, and likely vector for export of carbon from catchments.
Special category	Mod. (2)	Beach, cliff, crown reserve with public access, defense utilities, foreshore protection, aboriginal land, levees, sand spits, land in transition	Very small areas with some capacity for supporting blue carbon services
Transport and communication	Low (1)	Airports, railway, communication facilities, roads and road reserves, trig stations, beacons	Significant impacts to wetland vegetation (e.g. clearance), and significant impact to soil structure at reasonable depths.
Tree and shrub cover	High (3)	Hardwood, pine, poplar, rainforest, softwood plantations, native forest, logged and regenerated native forest, native woody shrub, riparian vegetation, tree lot, tree corridor	Includes forested areas that are likely to support understory of saline vegetation where conditions are suitable. Areas undergoing extensive logging, and likely to have significant impacts on soil organic carbon, do not occur within low-lying regions of the coast.
Urban	Low (1)	Residential, rural residential, landfill, abandoned urban or industrial land, aboriginal settlements, caravan parks, cemeteries, waste dump, recreation, tourism, education	Significant impacts to wetland vegetation (e.g. clearance), and significant impact to soil structure at reasonable depths.
Wetland	High (3)	Floodplain swamp, mangrove, mudflat, oyster leases, saltmarsh freshwater swamp	High conservation status and presumed high supply of ecosystem services.

Table S2. Tributaries (rivers and creeks) in which barriers were identified to have significant influence on tidal exchange.

Tributary	Catchment	Coordinates		Comments
		X	Y	
Alipou Creek	Clarence River	495272	6714838	Earth wall (levee bank) 200 m upstream from Clarence River
Anchorage Creek	Moruya River	239283	6021736	[waterway not recorded in Manly Hydraulics Laboratory, 2012]
Belmore River	Macleay River	498897	6559152	Heavy reed growth stops tide here – 1.7 km upstream from Seale Road
Bilambil Creek	Tweed River	545535	6877533	At Hogans Bridge on road to Upper Duroby
Boambee Creek	Boambee Creek	506730	6643998	140 m upstream from bridge on Lindsays Road
Boggy Creek	Bellinger River	501978	6630518	Tide would get to this vicinity 50 m downstream from corner of South Arm Road and Pacific Highway
Broadwater Creek	Clarence River	509753	6744785	Bund wall across creek, 1.8 km downstream from bridge [bund has been outflanked and some tidal flows now move upstream)
Camp Creek	Clarence River	518524	6740234	Floodgates 5 m downstream from bridge
Chickiba Creek	Richmond River	557376	6809624	Tidal to this vicinity, 2.4 km upstream from North Creek
Christies Creek	Cudgera Creek	553978	6860978	200 m upstream from Kanes Road
Clybucca Creek	Macleay River	497031	6576440	Floodgates at this point, 1.6 km downstream from Pacific Highway, any leakage would disperse into network of creeks and drains above floodgates (Lot 6322 DP 790009 Menarcobrinni Floodgate)
Cobaki Creek	Tweed River	545612	6880759	75m downstream from road bridge
Coldstream River	Clarence River	508593	6714212	At floodgates 0.6 km upstream from The Forks
Condong Creek	Tweed River	541826	6867069	Fully tidal creek connected back to Tweed River via Johnsons Creek
Coolongolook River	Wallis Lake	436630	6433801	At causeway at Locketts Crossing
Crawford River	Myall Lakes	424067	6412766	At tidal barrage, 75m upstream from Myall River (Lot 2, DP 544774)
Croobyar Creek	Narrawallee Inlet	267990	6091613	Downstream side of weir at Avonlea farm
Crookhaven Creek	Crookhaven River	290606	6136840	Downstream side of floodgates
Crookhaven River	Crookhaven River	289186	6131407	Downstream side of floodgates
Cubba Cubba Creek	Manning River	450860	6468498	Earth embankment 700 m downstream from old Pacific Highway (Lot 300, DP 1258073)
Cullendulla Creek	Cullendulla Creek	247616	6047910	Saltmarsh in this vicinity, 3.1 km upstream from Batemans Bay
Dignams Creek	Wallaga Lake	231060	5971790	Downstream side of weir
Dinsey Creek	Tweed River	544722	6869853	[waterway not recorded in Manly Hydraulics Laboratory 2012, tide blocked by a floodgate]
Duck Creek	Lake Illawarra	297407	6176947	Large rise at old culverts under old railway bridge, 1.9 km upstream from Lake
Duck Creek	Richmond River	546675	6805988	550 m upstream from bridge
Duck Creek East Canal	Richmond River	548033	6806751	[waterway not recorded in Manly Hydraulics Laboratory 2012, tide blocked by a floodgate]
Dulgugian Creek	Tweed River	541383	6870587	Fully tidal as creek now joined to Rous River by flood channels
Dunbible Creek	Tweed River	538753	6861411	May get a short way upstream from this vicinity
Dungarubba Creek	Richmond River	538572	6791678	Probably tidal to this vicinity, 875m upstream from bridge on Lismore Road (Lot 1, DP 1161249)
Dungay Creek	Tweed River	537469	6871003	Upstream side of right bend in creek, 760 m NW from Pipeclay Creek junction
Duroby Creek	Tweed River	547782	6876827	Downstream side of rock dam, 100 m from Benevis Place on Naponyah Road [An instream bund structure was removed by Tweed Shire Council as part of a Recreational Fishing Trust project to restore fish passage]
Emigrant Creek Canal	Richmond River	548479	6807506	[waterway not recorded in Manly Hydraulics Laboratory 2012, tide blocked by a floodgate]
Empire Vale Creek	Richmond River	549572	6801581	Tide now stopped by floodgates, 15m upstream from bridge on River Drive
Fernbank Creek	Hastings River	484617	6524761	Tidal to this point 900 m upstream from Hastings River Drive Barrier is located west of Lot 2, DP 1140746
Hursley Creek	Hastings River	476754	6522454	At weir 300 m upstream from Carecorara Inlet on Lot 4, DP 729799
Jellat Jellat Gully	Bega River	223078	5932377	Benooka Lake was tidal but now a weir 450 m upstream from Russells Bridge
Jerrara Creek	Minnamurra River	300177	6164593	Rise in creek directly below eastern side of new raised freeway - creek course not as marked on map so limit may be different when construction finishes
Kinchela Creek	Macleay River	498480	6569573	680 m upstream from floodgates tide stopped by reed growth
Kings Creek (South/Drain)	Brunswick River	550401	6840464	At Mullumbimby-Ewingsdale Road
Kooloobung Creek	Hastings River	491168	6522258	Tide disperses into wetland above this point, 0.9 km upstream from Lake Road
Lansdowne River	Manning River	454935	6481685	At weir near Lansdowne, 2.0 km downstream from railway bridge Lot 1, DP 223410
Leddays-McLeods Creek	Tweed River	549779	6872055	No apparent leakage through floodgates at Pacific Highway
Leos Creek	Twofold Bay	220546	5889198	At causeway on road crossing
Little Branch Creek	Port Stephens	408010	6395912	At ford where The Branch Lane crosses creek Lot 211, DP 870508
Little Bumbo Creek	Tuross River	230707	6007225	175 m upstream from Bumbo Creek

Tributary	Catchment	Coordinates X	Coordinates Y	Comments
Macquarie Rivulet	Lake Illawarra	296283	6174793	Large rise at old weir 550 m upstream from Princes Highway bridge (Lot 2, DP 533684)
Maguires Creek	Richmond River	547312	6813230	Southern end of golf course, 1 km upstream from bridge
Malabar Creek	Moruya River	238718	6022695	On downstream side of Highway culvert
Marshalls Creek	Brunswick River	551760	6847112	120 m upstream from Pacific Highway bridge
Mollymook Creek	Mollymook Creek	270494	6086768	Entrance usually closed but tide could get to slight rise, 750 m from entrance
Mondrook Creek	Manning River	445389	6470447	Tide stopped by earth embankment (Lot 85, DP 818028)
Mosquito Creek Canal	Richmond River	554036	6805456	No apparent leakage through floodgates near Mobbs Bay
Mullet Creek	Lake Illawarra	300896	6182365	Large rise at old weir, 400 m downstream from railway line
Mullumbimby Creek	Brunswick River	548066	6839694	At weir 520 m upstream from Poplar Street bridge [weir removed by Byron Shire Council as part of a Recreational Fishing Trust project to restore fish passage]
Nangudga Creek	Nangudga Lake	242296	5985160	Downstream side of weir 100 m downstream from Old South Coast Road
Ocean Shores (South)	Brunswick River	552974	6845754	Small weir 4m upstream from culverts under road going to maintenance sheds
Oyster Creek	Manning River	460370	6464299	Rises in creek then disperses into wetland 80 m upstream from cow track culverts (Lot 300, DP 1258073)
Pelican Bay	Manning River	464127	6474249	Not a closed system connected back to river at this point by culvert
Pipeclay Canal	Manning River	469333	6483407	At crossing on road to Coral Ville.
Poverty Creek	Clarence River	516575	6740294	Some leakage through floodgates at this point but creek connects back to river via Poverty Creek drain at 513440E, 6738520N, so no real tidal limit
Reserve Creek	Cudgen Creek	551701	6865664	Creek would be tidal all the way to Clothiers Creek Road
Saltpan Creek	Crookhaven River	290663	6132597	On upstream side of causeway near bend in Bournes Lane
Saltwater Creek (West)	Port Stephens	547520	6800136	Bund wall of Racecourse Swamp, 2.5 km upstream from Twelve Mile Creek (Lot 1 DP 1734441)
Saltwater Inlet	Macleay River	398316	6376686	Any leakage through floodgates at this point could get a further 700 m upstream
Saltwater Creek	Richmond River	503508	6576306	[waterway not recorded in Manly Hydraulics Laboratory 2012, tide blocked by a floodgate]
Southgate-Alumy Creek	Clarence River	501765	6722950	Tide stopped by weir 100 m from Clarence River
Sportsmans Creek	Clarence River	506257	6735297	Tide gets past barrage 3.5 km upstream from Clarence River and would probably reach at least to this point, 3.7 km downstream from railway bridge (Lot 1, DP 1234389)
Spring Creek	Spring Creek	302600	6162259	Large rise through culverts 900 m upstream from entrance
Stoney Creek	Lake Brou	238098	5997729	250 m upstream from Whittakers Creek
Swan Creek	Clarence River	496253	6717371	At floodgates 20 m upstream from Clarence River
Tandingulla Creek	Shoalhaven River	285843	6143129	Floodgates at Sopers Road in good condition
The Branch River	Port Stephens	407062	6399368	Very small tide measured immediately upstream of old causeway, 800 m downstream from The Branch Lane bridge
Tuckean Broadwater	Richmond River	539489	6793915	Tide in Hendersons Drain would disperse into Tuckean Swamp in this vicinity, 6.5 km upstream from Bagotville Barrage
Victoria Creek	Tilba Tilba Lake	241322	5978684	Old weir 250 m downstream from bridge on road to Sunnyside farm
Wallamba River	Wallis Lake	440824	6447536	Old causeway at Clarksons Crossing, 300 m upstream from Pacific Highway
Watt Creek	Nambucca River	495947	6604999	At start of new drainage works, 1.8 km upstream from Nambucca River
Williams River	Hunter River	381432	6385687	Tide stopped by Seaham Weir, 500 m upstream from The Jim Scott Bridge (Lot 11 DP 542642)

Comments are as copied from Manly Hydraulics Laboratory (2012). Additional notes are in brackets

Table S3. Area (ha) of low, moderate, high, and total cell scores for blue carbon storage, preservation, generation and permanency in catchments.

Estuary	Catchment Area (ha)	Storage			Preservation			Generation			Permanency						
		Low	Mod.	High	Total	Low	Mod.	High	Total	Low	Mod.	High	Total	Low	Mod.	High	Total

Tributaries and catchments are listed in alphabetical order.

Table S7. Coefficient of determination (r^2), F -ratio and P -value for linear, exponential and full factorial linear models of relationships between catchment area (ha), estuary type (III or IV) and estuary maturity (A, B, C or D), and response variables of high BCI, BCC and BCP area.

Catchment	Regression	Response variable	BCI High	BCC High	BCP High
North & South Coasts	Linear	r^2	0.7767	0.4845	0.7884
		F -ratio	507.9478	137.2385	543.9484
		P -value	<0.0001	<0.0001	<0.0001
	Exponential	r^2	0.7853	0.4824	0.5229
		F -ratio	504.7016	133.2543	139.1824
		P -value	<0.0001	<0.0001	<0.0001
	Full factorial	r^2	0.7831	0.547	0.7972
		F -ratio	29.5546	9.886	32.1911
		P -value	<0.0001	<0.0001	<0.0001
North Coast	Linear	r^2	0.7661	0.4758	0.784
		F -ratio	193.1959	53.553	214.1552
		P -value	<0.0001	<0.0001	<0.0001
	Exponential	r^2	0.886	0.707	0.7933
		F -ratio	435.3911	142.374	211.1002
		P -value	<0.0001	<0.0001	<0.0001
	Full factorial	r^2	0.7832	0.6268	0.7984
		F -ratio	10.835	5.0392	11.8789
		P -value	<0.0001	<0.0001	<0.0001
South Coast	Linear	r^2	0.9581	0.5137	0.8272
		F -ratio	1942.493	89.7971	406.8621
		P -value	<0.0001	<0.0001	<0.0001
	Exponential	r^2	0.6407	0.2894	0.2041
		F -ratio	142.6852	33.4	17.948
		P -value	<0.0001	<0.0001	<0.0001
	Full factorial	r^2	0.9655	0.7575	0.8612
		F -ratio	132.2904	14.785	29.3733
		P -value	<0.0001	<0.0001	<0.0001

Table S8. Area (ha) of low, moderate, high, and total cell scores for blue carbon storage, preservation, generation and permanency in tributaries based on the watershed area located above instream barriers.
