

# PACIFIC CONSERVATION BIOLOGY

Volume 11

Number 2

ISSN 1038-2097

## Contents

### EDITORIAL

- Welcome to the Arbustocene. *H. F. Recher and P. R. Ehrlich.* 77

### NEWS AND VIEWS

- News from the Australasian Section of the Society for Conservation Biology. *N. Nelson.* 79

### RESEARCH PAPERS

- Native vegetation of coastal floodplains — a diagnosis of the major plant communities in New South Wales. *D. A. Keith and J. Scott.* 81
- Distribution, biology and prey selection of the introduced Norway Rat *Rattus norvegicus* at Kiska Island, Aleutian Islands, Alaska. *H. L. Major and I. L. Jones.* 105
- Decline in the prevalence of chytridiomycosis in frog populations in North Queensland, Australia. *K. R. McDonald, D. Méndez, R. Müller, A. B. Freeman and R. Speare.* 114
- A test of fluctuating asymmetry as a bioindicator of stress in antlered flies. *G. Dodson.* 121
- Re-establishing the endangered grassland herb *Trioncinia retroflexa* (Asteraceae). *R. J. Fensham and R. J. Fairfax.* 128
- Prospects for a restorative fishery enhancement of Lake Kununurra: a high-level tropical impoundment on the Ord River, Western Australia. *R. G. Doupe, D. L. Morgan and H. S. Gill.* 136

### BOOK REVIEWS

- Flight of the Huia: Ecology and Conservation of New Zealand's Frogs, Reptiles, Birds and Mammals. *J. Hoare.* 147
- Achieving Sustainable Freshwater Systems: A Web of Connections. *M. Cumbers.* 148
- Food Webs at the Landscape Level. *R. Whipp.* 148
- Memo for a Saner World. *L. Turner.* 150
- The Fauna of King Island. A guide to identification and conservation management. *L. Turner.* 151

Papers submitted to *Pacific Conservation Biology* are individually and fully peer reviewed by a minimum of two referees. Referees are independent of the editorial board and are chosen for their expertise in the subject area of the paper submitted. In addition, papers are vigorously reviewed and edited by the editorial board. Nonetheless, the views put by authors are their own and do not necessarily reflect those of the editors or the Publisher.

### COPYRIGHT

Submission of a paper to *Pacific Conservation Biology* will be taken to imply that it presents original unpublished work, not under consideration for publication elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microfilm or any other reproductions of similar nature, and translations.

Permission to publish illustrations must be obtained by the author before submission and any acknowledgements should be included in the captions.

Authors of papers in *Pacific Conservation Biology* should be subscribers to the journal. Please indicate whether one or more of the authors is a subscriber. Not subscribing will not affect the publication of the paper. However, whereas subscribers receive 25 free reprints and do not pay page charges, non-subscribers do not receive free reprints and will be asked to pay a nominal AUD\$20 per printed page. These charges will be invoiced when page proofs are sent to authors. If they do not receive grant or institutional support for publication, contributors may request an exemption from page charges. This is similar to procedures followed by other journals, including the Australian Ecological Society and the Royal Society of Western Australia in the publication of their journals. Authors may accelerate publication of their papers to the next available issue without penalty to other authors by paying full page charges of AUD\$65 per page. This still represents a significant publication subsidy.

For your convenience subscription forms have been enclosed. The increased cost is largely the result of the introduction of a government sales tax on knowledge in Australia. If you already subscribe, assist the conservation of biodiversity in the Pacific Region by encouraging a colleague and/or library to subscribe.

ON FRONT COVER: Top — An example of Swamp Sclerophyll Forest on coastal floodplains, an endangered ecological community with the endangered orchid, *Phaius australis* (foreground). Photo by Hugh Nicholson.

Below — Coomonderry Swamp, near Nowra, an example of Freshwater Wetlands on coastal floodplains, an endangered ecological community. Photo by Pavel German.
