
Australian Journal of Physics

Volume 33

Melbourne 1980

Australian Journal of Physics

A medium for the publication of results of original scientific research in pure and applied physics.

Board of Standards

The Board of Standards for this Journal is appointed by the Commonwealth Scientific and Industrial Research Organization and the Australian Academy of Science and consists of:

L. T. Evans (Chairman)
E. F. Annison
A. R. H. Cole
R. W. Crompton
B. V. Hamon
M. D. Hatch
A. J. Pittard
J. P. Quirk
B. J. Robinson
D. E. Tribe
C. H. Tyndale-Biscoe
A. B. Wardrop
B. J. Walby (Editor-in-Chief)

Advisory Committee

Acceptance of papers for this Journal is in the hands of an Advisory Committee consisting of a Chairman appointed by the Executive of CSIRO and the Council of the Australian Academy of Science, and members appointed by the Board of Standards in consultation with the Australian Institute of Physics.

R. W. Crompton (Chairman) (AIP)
W. S. Boundy
C. A. Hurst
B. Y. Mills
T. F. Smith
B. M. Spicer
L. J. Tassie
B. J. Walby (*ex officio*)

Published in Melbourne for the Commonwealth Scientific and Industrial Research Organization and the Australian Academy of Science under the editorial control of D. E. Boyd and R. P. Robertson.

Issued six times a year.

Annual subscription \$A40.

Australian Journal of Physics

Contents Volume 33 Number 1 March 1980

Nuclear Physics

Analysis of the (p, 2p) reaction in an asymmetric energy-sharing mode. *R. Smith, I. Morrison and K. Amos* 1

Fluid Dynamics and Plasma Physics

An interpretation of the blue satellite to resonance lines of helium-like ions of third sequence elements in laser-produced plasmas. *F. E. Irons* 25

Ratio of sheath thickness to Debye length for a slightly ionized continuum plasma. *John A. Hamilton* 39

Some predictions from the mean field equations of magnetoconvection. *N. Riahi* 47

Nonlinear double-diffusive convection in a low Prandtl number fluid. *N. Riahi* 59

Condensed Matter

Stress enhancement of the *G* line of singly ionized zinc in germanium. *K. J. Duff, P. Fisher and N. R. Butler* 73

Photoacoustic measurements on semiconducting powder samples. *K. Y. Wong* 91

Thermodynamics and Statistical Mechanics

Definition of heat in open systems. *D. A. Smith* 95

The Haus-Tanaka model for the ice VII-ice VIII phase transition. *J. Ho-Ting-Hun and J. Oitmaa* 107

Cosmic Rays

Cosmic rays in the galactic centre. *Masato Yoshimori* 115

Astronomy and Astrophysics

Mode coupling in the solar corona. VI. Direct conversion of Langmuir waves into o-mode waves. *D. B. Melrose* 121

Galactic plane H₂O masers: a southern survey. *R. A. Batchelor, J. L. Caswell, W. M. Goss, R. F. Haynes, S. H. Knowles and K. J. Wellington* 139

Australian Journal of Physics

Contents Volume 33 Number 2A May 1980

Nuclear Physics

Neutron and proton capture by ${}^6\text{Li}$. *F. C. Barker* 159

The ${}^7\text{Be}(p,\gamma){}^8\text{B}$ cross section at low energies. *F. C. Barker* 177

Application of the Frahn scaling formula to the analysis of the excitation of 1^- states in ${}^{40}\text{Ca}$ by ${}^9\text{Be}$ scattering. *John S. Eck, T. R. Ophel, D. C. Weissner and P. D. Clark* 191

The non-statistical population of the $11.10\text{ MeV } (4^+)$ state in ${}^{16}\text{O}$ by ${}^{12}\text{C}({}^6\text{Li}, d)$. *K. W. Kemper and T. R. Ophel* 197

$\text{D}(d, n){}^3\text{He}$ differential cross sections from 18 to 26 MeV. *A. B. Jones* 203

Particles and Fields

Pion charge exchange scattering at high energies. *M. Saleem, M. Rafique, Sanaullah Bhatti and Fazal-e-Aleem* 209

Atomic and Molecular Physics

The drift velocity of low energy electrons in oxygen at 293 K. *Ivan D. Reid and Robert W. Crompton* 215

Electron drift velocities in air. *R. Hegerberg and I. D. Reid* 227

The drift velocity of electrons in mercury vapour at 573 K. *M. T. Elford* 231

The momentum transfer cross section for electrons in mercury vapour from 0.1 to 5 eV. *M. T. Elford* 251

Relativistic effects in electron scattering by atoms. I. Elastic scattering by mercury. *L. T. Sin Fai Lam* 261

Fluid Dynamics and Plasma Physics

An interpretation of anomalous intensity ratios within the hydrogen-like L_α doublet in optically thick laser-produced plasmas. *F. E. Irons* 283

Condensed Matter

Finite ligand size and the Sternheimer antishielding factor γ_∞ . *S. Ahmad and D. J. Newman* 303

Electromagnetism and Optics

Barrier theory based on half-barrier penetration. *J. Heading* 307

Shifts of coherent light beams on reflection at plane interfaces between isotropic media. *R. G. Turner* 319

Cosmic Rays

Some characteristics of the interactions of 1.9 GeV n^{-1} iron nuclei with photographic emulsion. *C. B. A. McCusker* 337

Australian Journal of Physics

Contents Volume 33 Number 2B July 1980

Kinetic Theory

Kinetic theory of charged particle swarms in neutral gases. *Kailash Kumar, H. R. Skullerud and R. E. Robson* 343

Matrix elements of the Boltzmann collision operator in a basis determined by an anisotropic Maxwellian weight function including drift. *Kailash Kumar* 449

Relation between polynomials orthogonal with respect to a class of gaussian weight functions *Kailash Kumar* 469

Australian Journal of Physics

Contents Volume 33 Number 3 September 1980

Particles and Fields

Dipole pomeron and proton-proton elastic scattering at high energies.
Mohammad Saleem, Fazal-e-Aleem and Mujahid Kamran 481

Nuclear Physics

Is nuclear physics the molecular physics of coloured quarks? *Geoffrey Freeman and Bruce H. J. McKellar* 487

A comparison of spectroscopic models of low excitation 2^+ states in ^{24}Mg and ^{28}Si from inelastic proton scattering. *K. Amos, P. Nesci and I. Morrison* 495

Electric quadrupole excitation of the first excited state of ^{11}B . *M. P. Fewell, R. H. Spear, T. H. Zabel and A. M. Baxter* 505

Static quadrupole moment of the first excited state of ^{28}Si . *R. H. Spear and M. P. Fewell* 509

Atomic and Molecular Physics

The drift velocity of electrons in carbon dioxide at temperatures between 193 and 573 K. *M. T. Elford and G. N. Haddad* 517

A two-accelerator facility and its use for radiation damage studies in alkali halides. *C. S. Newton and H. J. Hay* 549

Fluid Dynamics and Plasma Physics

Parametric instabilities in a magnetized and collisional plasma. *D. R. Phalswal and Anil Dube* 531

A study of centre-fed antiphase circular antennas in a warm plasma.
K. R. Soni and C. L. Arora 539

Condensed Matter

The static lattice model of Hardy and Bullough applied to the noble metals to calculate divacancy interaction energies and relaxations. *D. D. Richardson* 561

Neutron diffraction—the total powder pattern. *T. M. Sabine* 565

Internal degrees of freedom and anelasticity in glasses. *D. A. Smith and P. Cookson* 573

[Continued overleaf]

AUJPAS 33(3) 481–669 (1980)

Electromagnetism and Optics

Velocity measurement with speckle and speckle-like photography. *P. L. Baker, F. Ninio, G. J. Troup and R. Bryant* 601

Cosmic Rays

Zenith angle dependence of cosmic ray shower development from observations of the time structure of atmospheric Cerenkov pulses. *R. W. Clay and G. J. Thornton* 607

Astronomy and Astrophysics

Fluxoid dynamics in relativistically streaming plasmas. *R. R. Burman* 611

Accretion of planetesimals within a gaseous ring. *A. J. R. Prentice* 623

Survey of OH masers at 1665 and 1667 MHz. I. Galactic longitudes 326° to 340° . *J. L. Caswell, R. F. Haynes and W. M. Goss* 639

Australian Journal of Physics

Contents Volume 33 Number 4 October 1980

Particles and Fields

On the relationship between quantum, random and semiclassical electrodynamics.
B. Davies and A. N. Burkitt 671

Nuclear Physics

Charged particle photoemission from ^{42}Ca . *R. E. Pywell, M. N. Thompson, K. Shoda, M. Sugawara, T. Saito, H. Tsubota, H. Miyase, J. Uegaki, T. Tamae, H. Ohashi and T. Urano* 685

The low-lying levels of ^{13}C and ^{13}N . *F. C. Barker and Nasima Ferdous* 691

Fluid Dynamics and Plasma Physics

Quantum theory of energy loss by test ions to plasma. *T. Hamada, Y. Nakamura and E. P. George* 719

Condensed Matter

The orbit-lattice interaction for lanthanide ions. II. Strain and relaxation time predictions for cubic systems. *D. J. Newman* 733

Heat flow at pressed contacts. *H. J. Goldsmid and M. M. Kaila* 745

Cosmic Rays

The distribution of time intervals between cosmic ray showers—a study of the randomness of cosmic ray arrival times. *R. W. Clay and P. R. Gerhardy* 753

General Relativity and Gravitation

Hyperbolic motion in gravitational theories. *W. Davidson* 757

Spherically symmetric charged dust distribution in general relativity. I. General solution. *B. K. Nayak* 765

Astronomy and Astrophysics

Flow dynamics in pulsar magnetosphere models with particle inertia.
R. R. Burman 771

Australian Journal of Physics

Contents Volume 33 Number 5 November 1980

*Papers presented at Fourth AIP National Physics Congress,
University of Melbourne, August 1980*

Nuclear and Particle Physics

What is happening in particle physics theory: a review talk for non-particle physicists. *Helen R. Quinn* 789

Nuclear systematics in the interacting boson (IBA) model. *I. Morrison* 801

The lost neutrinos of the Sun. *L. S. Peak* 821

Electron and Ion Spectroscopy

Angular correlations in electron-atom scattering. *James F. Williams* 827

Ion scattering spectrometry. *R. J. MacDonald* 843

Physics of Condensed Matter

Phonons, lattice instabilities and superconductivity. *Harold G. Smith* 861

Magnetic order in spatially disordered systems. *T. J. Hicks* 881

Atmospheric and Environmental Physics

Numerical modelling of climate. *B. G. Hunt* 897

Cosmic Rays

Cosmic rays in the energy range 10^{14} – 10^{17} eV. *A. M. Hillas* 911

Radiophysics, Astrophysics and Gravitation

Progress in the development of high sensitivity gravitational radiation antennas.
D. G. Blair 923

Australian Journal of Physics

Contents Volume 33 Number 6 December 1980

Particles and Fields

Enumeration of group invariant quartic polynomials in Higgs scalar fields.

B. G. Wybourne 941

Colour-spin matrix elements for multiquark systems. *R. P. Bickerstaff and*

B. G. Wybourne 951

Nuclear Physics

Analysis of angular distributions of heavy-ion transfer reactions.

C. B. O. Mohr 965

Atomic and Molecular Physics

Electron transport in argon-hydrogen mixtures. *G. N. Haddad and*

R. W. Crompton 975

Temperature dependence of the diffusion coefficient for thermal electrons in carbon dioxide over the range 296–468 K. *R. Hegerberg, M. T. Elford and*

R. W. Crompton 985

The diffusion coefficient for thermal electrons in mercury vapour at 470 K.

R. Hegerberg and R. W. Crompton 989

Fluid Dynamics and Plasma Physics

The effects of preionization level on a 'stabilized' Z-pinch. *C. Silawatshananai,*

F. S. B. Anderson, M. H. Brennan, G. Durance, I. R. Jones, E. L. Murray and

J. Tendys 1001

Condensed Matter

On the interface structure in a simple cubic Ising system. *C. H. J. Johnson* 1017

Techniques and convergence properties of EFG lattice summations. *W. A. Barton and J. D. Cashion* 1033

Simple theory of the 'negative residual linewidth' in reflection spectroscopy of magnetically concentrated local moment systems. *A. M. Stewart* 1049
