
Australian Journal of Physics

Volume 35

Melbourne 1982

Australian Journal of Physics

A journal for the publication of results of original scientific research in pure and applied physics.

This journal is one of the Australian Journals of Scientific Research published by the Commonwealth Scientific and Industrial Research Organization with the cooperation of the Australian Academy of Science. Editorial policy for the journal series is developed by a Board of Standards appointed jointly by CSIRO and the Australian Academy of Science.

Editors

R. P. Robertson
B. J. Schmetzer

Advisory Committee

Acceptance of papers for this journal is in the hands of an Advisory Committee appointed after consultation with the Board of Standards and the Australian Institute of Physics.

Chairman T. F. Smith

Members L. T. Chadderton

J. Graham
C. A. Hurst
D. B. Melrose (AIP)
B. Y. Mills
B. M. Spicer
L. J. Tassie
B. J. Walby (*Editor-in-Chief*)

Issued six times a year

Annual subscription \$A80 (surface)
\$A92 (air mail)

Australian Journal of Physics

Contents Volume 35 Number 1 1982

Nuclear Physics

Analysis of angular distributions of heavy-ion inelastic collisions.

C. B. O. Mohr 1

Excitation of the $9.50 \text{ MeV } (\frac{9}{2}^+)$ state of ^{13}C in intermediate energy scattering experiments. *L. Rikus, S. F. Collins, K. A. Amos, B. M. Spicer, G. G. Shute, I. Morrison, V. C. Officer, R. Smith, D. W. Devins, D. L. Friesel and W. P. Jones* 9

Surface effects on the energy gap in nuclear matter. *K. Amos and F. Robbins* 17

Atomic and Molecular Physics

Scattering cross sections in argon from electron transport parameters.

G. N. Haddad and T. F. O'Malley 35

Fluid Dynamics and Plasma Physics

Covariant description of dispersion in a relativistic thermal electron gas.

D. B. Melrose 41

Condensed Matter

The electronic states of some metal impurities in germanium. *S. J. Pearton* 53

Cosmic Rays

Sea level measurements of properties of cosmic ray showers with sizes ranging from 2×10^5 to 10^7 particles. *R. W. Clay and P. R. Gerhardy* 59

Astronomy and Astrophysics

'Plasma emission' without Langmuir waves. *D. B. Melrose* 67

Metre wavelength solar radio bursts with periodic modulation. *G. R. A. Ellis* 87

Galactic radio emission below 16.5 MHz and the galactic emission measure.

G. R. A. Ellis 91

Corrigendum to: The ratio of the lateral diffusion coefficient to mobility for electrons in argon at 294 K. *H. B. Milloy and R. W. Crompton* 105

Volume 34, Number 6 was published on 19 January 1982

Australian Journal of Physics

Contents Volume 35 Number 2 1982

Fluid Dynamics and Plasma Physics

The effect of discharge depth on contaminant dispersion in turbulent open channel flow. *Albert J. Gabric* 107

Thermosolutal instability of a Hall plasma. *R. C. Sharma and K. N. Sharma* 125

Condensed Matter

The orbit-lattice interaction for lanthanide ions. III. Superposition model analysis for arbitrary symmetry. *S. C. Chen and D. J. Newman* 133

Charge response of jellium surface through ripplons. *J. Mahanty* 147

Ionospheric Physics

Doppler shift of radio signals transmitted between orbiting satellites. *P. L. Dyson and J. A. Bennett* 155

Astronomy and Astrophysics

Observations of the Jupiter S-bursts between 3.2 and 32 MHz. *G. R. A. Ellis* 165

The Parkes 2700 MHz survey: A resurvey of the $\pm 4^\circ$ declination zone. *Alan E. Wright, David L. Jauncey, J. G. Bolton and Ann Savage* 177

New optical identifications from the Parkes 2700 MHz resurvey of the $\pm 4^\circ$ declination zone. *Ann Savage, J. G. Bolton and Jenny Trett* 207

Corrigendum to: Simple theory of the 'negative residual linewidth' in reflection spectroscopy of magnetically concentrated local moment systems. *A. M. Stewart* 221

Volume 35, Number 1 was published on 2 April 1982

Australian Journal of Physics

Contents Volume 35 Number 3 1982

Particles and Fields

Rotating strings, glueballs and exotic mesons. *C. J. Burden and L. J. Tassie* 223

Effective weak non-leptonic Hamiltonians for flavour changing processes.
Robert D. C. Miller and Bruce H. J. McKellar 235

Nuclear Physics

Resonance neutron capture in $^{86,87}\text{Sr}$. *G. C. Hicks, B. J. Allen,
A. R. de L. Musgrove and R. L. Macklin* 267

The giant dipole resonance effect in Coulomb excitation of ^{10}B . *W. J. Vermeer,
T. H. Zabel, M. T. Esat, J. A. Kuehner, R. H. Spear and A. M. Baxter* 283

GDR contribution to Coulomb excitation. I. $1p$ shell nuclei. *F. C. Barker* 291

GDR contribution to Coulomb excitation. II. ^{17}O . *F. C. Barker* 301

Condensed Matter

Thermodynamic studies and magnetic ordering of Ni-Cr alloys close to the
critical composition. *M. A. Simpson and T. F. Smith* 307

Astronomy and Astrophysics

The radio properties of a complete sample of bright galaxies. *J. I. Harnett* 321

Corrigendum to: Excitation of the $9.50\text{ MeV } (\frac{9}{2}^+)$ state of ^{13}C in intermediate
energy scattering experiments. *L. Rikus, S. F. Collins, K. A. Amos, B. M. Spicer,
G. G. Shute, I. Morrison, V. C. Officer, R. Smith, D. W. Devins, D. L. Friesel
and W. P. Jones* 351

Volume 35, Number 3 was published on 11 June 1982

Australian Journal of Physics

Contents Volume 35 Number 4 1982

Particles and Fields

Exact solutions of the Heisenberg equations and Zitterbewegung of the electron in a constant uniform magnetic field. *A. O. Barut and A. J. Bracken* 353

Nuclear Physics

Recoil-distance lifetime measurements of ^{47}Sc levels. *H. Ohnuma, P. B. Foot, T. Aoki, C. G. Ryan and H. H. Bolotin* 371

GDR contribution to Coulomb excitation. III. ^{18}O . *F. C. Barker* 377

Relative yields of stable tellurium isotopes in neutron-induced fission. *J. R. de Laeter, K. J. R. Rosman and J. W. Boldeman* 385

Atomic and Molecular Physics and Spectroscopy

Electron-hydrogen elastic scattering at intermediate and high energies. *J. N. Das, A. K. Biswas and N. Saha* 393

Some theorems concerning group representations generated by determinantal wavefunctions. *K. J. Duff* 401

Fluid Dynamics and Plasma Physics

Parametric instabilities in a magnetized plasma. *B. K. Shivamoggi* 409

Condensed Matter

The anharmonic temperature factor for crystals with the hexagonal wurtzite structure and its inclusion in models for least-squares refinement of intensity data. *A. Fakineos, A. W. Stevenson and Z. Barnea* 415

Thermodynamics and Statistical Mechanics

Statistical thermodynamics of nonideal plasma. *H. E. Wilhelm and A. H. Khalfaoui* 425

Cosmic Rays

Dependence on declination of the intensity of cosmic ray showers with primary energies of about 10^{16} eV. *R. W. Clay and P. R. Gerhardy* 441

Astronomy and Astrophysics

The loss-cone driven electron-cyclotron maser. *R. G. Hewitt, D. B. Melrose and K. G. Rönmark* 447

Corrigendum to: An investigation of the accuracy of numerical solutions of Boltzmann's equation for electron swarms in gases with large inelastic cross sections. *I. D. Reid* 473

Volume 35 Number 3 was published on 18 August 1982

Australian Journal of Physics

Contents Volume 35 Number 5 1982

*Papers presented at the Conference on Atomic and Molecular Reactions
and Structure, Flinders University of South Australia, February 1982.
Coordinator P. J. O. Teubner*

Electron Scattering from Atoms

A new class of atomic states: the 'Wannier-ridge' resonances. *F. H. Read* 475

Electron-photon coincidence studies in sodium. *P. J. O. Teubner, J. E. Furst and
J. L. Riley* 501

Large momentum transfer excitation of $\text{He}(3^1\text{P})$ by electron impact at 81.2 eV
incident energy. *R. McAdams and J. F. Williams* 513

Orientation of $\text{He}(2^1\text{P})$ by electron impact excitation and polarization of the
radiative decay. *D. E. Golden and N. C. Steph* 521

Stepwise electron-laser excitation studies of atoms. *C. W. McLucas,
W. R. MacGillivray and M. C. Standage* 533

Intermediate-energy electron scattering by atomic hydrogen. *I. E. McCarthy and
A. T. Stelbovics* 543

The pulsed electron beam time-of-flight method for measuring absolute total cross
sections: atomic helium. *Robert K. Jones and R. A. Bonham* 559

Molecular Structure and Reactions

Electron coincidence spectroscopy: an introduction to momentum space chemistry.
Erich Weigold 571

Rotational and vibrational transitions in molecular collisions.
J. Peter Toennies 593

Infrared laser spectroscopy of molecular beams. *C. V. Broughton, R. E. Miller and
R. O. Watts* 611

The infrared absorption spectrum of water. *D. F. Coker, J. R. Reimers and
R. O. Watts* 623

[Continued overleaf]

AUJPAS 35(5) 475-660 (1982)

The theory and computational implementation of quadratically convergent Hartree-Fock orbital optimization methods and their relationship to the time-dependent Hartree-Fock and RPA methods. *George B. Bacskay* 639

Electrostatic and relaxation effects in ionization of intermolecular complexes. *J. Barrie Peel* 651

Volume 35 Number 4 was published on 21 October 1982

Australian Journal of Physics

Contents Volume 35 Number 6 1982

Particles and Fields

An algebraic description of perturbation theory in quantum electrodynamics.

J. D. Wright 661

A hybrid model for charmed meson decays. *Richard M. Gorman and*

Bruce H. J. McKellar 679

Nuclear Physics

The extremely large effective Coulomb matrix element of $^{66}\text{Ge} \rightarrow ^{66}\text{Ga}$.

C. T. Yap and E. L. Saw 687

Atomic and Molecular Physics and Spectroscopy

Relativistic intermediate-coupling calculations for ions of the beryllium isoelectronic sequence. *R. Glass* 693

A semi-empirical law for sputtering in plasma devices. *J. L. Cook,*

E. K. Rose and J. W. Connolly 699

Removal of channelled spectra signatures in Fourier spectroscopy.

K. J. Grant, P. Fisher, M. Kosaka and A. D. Martin 709

The shape of the current-voltage curve for a flame ionization detector with two ionic components. *H. C. Bolton* 715

Applied Physics

The role of electron microscopy in materials science. *P. B. Hirsch* 727

The physics of macromolecules. *Peter Mason* 737

Gallium arsenide as a competitor to silicon for high-speed amplification and switching. *P. H. Ladbrooke, D. R. Debuf, K. Nanayakkara and*

D. R. Wilkins 749

Nuclear magnetic resonance imaging. *J. M. Pope* 761

[Continued overleaf]

AUJPAS 35(6) 661-790 (1982)

The contribution of surface analysis and surface science to technology.
C. J. Powell 769

Surface topography measurement and analysis. *E. G. Thwaite* 777
