Australian Journal of Physics

A journal for the publication of original research in pure and applied physics

This journal is one of the twelve Australian Journals of Scientific Research published by the Commonwealth Scientific and Industrial Research Organisation with the cooperation of the Australian Academy of Science. Editorial policy for the AJSR series is developed by a Board appointed jointly by CSIRO and the Academy of Science.

Editorial Board

Acceptance of papers for this journal is supervised by an Editorial Board appointed by CSIRO and the Academy of Science after consultation with the Australian Institute of Physics. All papers are refereed. Editorial Board members advise the managing editor on the selection of referees and adjudicate in the case of conflicting or adverse reports.

Chair D. B. Melrose University of Sydney (AIP)

Members J. L. Caswell CSIRO Division of Radiophysics
 J. G. Collins CSIRO Division of Applied Physics
 R. H. Dalitz University of Oxford
 S. M. Hamberger Australian National University
 P. Hannaford CSIRO Division of Materials Science & Technology
 B. H. J. McKellar University of Melbourne
 M. A. Morrison University of Oklahoma
 J. Oitmaa University of New South Wales
 R. H. Spear Australian National University
 E. Weigold Flinders University

Managing Editor

R. P. Robertson

Annual subscription

Australia and New Zealand:
\$A150 (surface)
\$A190 (air)

Other countries:
\$US150 (surface)
\$US190 (air)

Microfiche: \$A70

Back issues: \$A25

Issued six times a year

The Notice to Authors is published in the first issue of each volume. Copies are available on request.

All inquiries and manuscripts should be forwarded to the

Managing Editor,
Australian Journal of Physics,
314 Albert Street,
East Melbourne, Vic. 3002, Australia.

Telephone (03) 418 7333
Telex AA 30236
Fax (03) 419 0459

Permission to photocopy items from this journal is granted by CSIRO to libraries and other users registered with the Copyright Clearance Center (CCC), provided that the stated fee for each copy is paid directly to the CCC, 27 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to the Managing Editor, CSIRO, 314 Albert Street, East Melbourne, Vic. 3002, Australia.

Australian Journal of Physics

A journal for the publication of original research in pure and applied physics

Contents Volume 41 Number 1 1988

General Physics

Stability of mKdV–KdV waves. *K. Murawski and E. Infeld* 1

Elementary Particles and Fields

Why baryons are not Skyrmions. *R. T. Cahill, C. D. Roberts and J. Praschifka* 11

Magnetic moments of baryons in a relativistic constituent quark model.
N. E. Tupper, B. H. J. McKellar and R. C. Warner 19

Nuclear Physics

Charge symmetry breaking in neutron–proton scattering above pion production threshold. *J. A. Niskanen and A. W. Thomas* 31

Coulomb excitation of the 4_1^+ states of $^{194,196,198}\text{Pt}$. *M. P. Fewell, G. J. Gyapong and R. H. Spear* 37

Atomic and Molecular Physics

A least squares computational method for the scattering amplitude. *J. N. Das* 47

Fluids, Plasmas and Electric Discharges

A formal time-domain approach to cold magnetised plasmas.
Werner Weiglhofer 55

Nonlinear bifurcations to time-dependent Rayleigh–Benard convection.
J. M. Lopez and J. O. Murphy 63

Condensed Matter: Structure, etc.

Experimental study of the phase transition in $(\text{CH}_2)_8(\text{NH}_3)_2\text{FeCl}_{4-x}\text{Br}_x$
($x = 0, 1$ and 2). *M. A. Ahmed, M. M. El-Desoky and F. A. Radwan* 83

Geophysics, Astronomy and Astrophysics

A search for tachyons in cosmic ray showers. *R. W. Clay* 91

Corrigendum to: Nonlinear instability of ion–cyclotron whistlers in the ionosphere.
B. Chakraborty, A. K. Sur and S. N. Paul 100

Volume 40, Number 6, was published on 21 December 1987

Australian Journal of Physics

A journal for the publication of original research in pure and applied physics

Contents Volume 41 Number 2 1988

Papers presented at the International Symposium on X-ray Powder Diffractometry, held at Fremantle, Australia, 20–23 August 1987.

Guest Comment. *Jim Graham*

Advances in synchrotron X-ray polycrystalline diffraction. *William Parrish* 101

The Rietveld method—A historical perspective. *H. M. Rietveld* 113

Acquisition of powder diffraction data with synchrotron radiation. *D. E. Cox, B. H. Toby and M. M. Eddy* 117

Powder diffractometry at the Tsukuba photon factory. *R. Uno, H. Ozawa, T. Yamanaka, H. Morikawa, M. Ando, K. Ohsumi, A. Nukui, K. Yukino and T. Kawasaki.* 133

Profile data acquisition for the JCPDS–ICDD database. *Ron Jenkins* 145

Investigation of the structural and magnetic properties of the light rare earth elements and their intermetallic compounds. *D. C. Creagh* 155

Profile analysis for microcrystalline properties by the Fourier and other methods. *J. I. Langford, R. Delhez, Th.H. de Keijser and E. J. Mittemeijer* 173

Generalised least-squares determination of triaxial stress states by X-ray diffraction and the associated errors. *R. A. Winholtz and J. B. Cohen* 189

Precision peak determination in X-ray powder diffraction. *T. C. Huang* 201

Size and strain parameters from peak profiles: Sense and nonsense. *R. Delhez, Th.H. de Keijser, E. J. Mittemeijer and J. I. Langford* 213

Learned peak shape functions for powder diffraction data. *A. Hepp and Ch. Baerlocher* 229

Pitfalls in the evaluation of X-ray diffraction line shape. *Gerhard Zorn* 237

X-ray line broadening study on shock-modified zirconia. *B. Morosin, R. A. Graham, Y. Zhang, J. M. Stewart and C. R. Hubbard* 251

Structure and properties of surface layers: X-ray diffraction studies. *R. Delhez, Th.H. de Keijser, E. J. Mittemeijer, B. J. Thijssen, M. A. Hollanders, O. B. Loopstra and W. G. Sloof* 261

[Continued overleaf]

Crystal structure analysis and refinement using integrated intensities from accurate profile fits. *G. Will* 283

Pressing the limits of Rietveld refinement. *R. A. Young* 297

Use of full diffraction spectra, both experimental and calculated, in quantitative powder diffraction analysis. *Deane K. Smith, Gerald G. Johnson, Jr and Andrew M. Wims* 311

Quantitative analysis of phases in zeolite bearing rocks from full X-ray diffraction profiles. *J. C. Taylor and S. R. Pecover* 323

Australian Journal of Physics

A journal for the publication of original research in pure and applied physics

Contents Volume 41 Number 3 1988.

Papers presented at the International Symposium on Accuracy in Structure Factor Measurement, held at Warburton, Australia, 23–26 August 1987.

Guest Comment. *Barbara Moss and Stephen Wilkins*

Accurate charge density—Pendellösung methods. *Norio Kato* 337

Validity of the structure factor formalism. *Jimpei Harada.* 351

Structure factor determination in surface X-ray diffraction. *I. K. Robinson* 359

The anharmonic temperature factor in crystallographic structure analysis.
W. F. Kuhs 369

Use of extinction corrections in neutron diffraction experiments.
A. Delapalme 383

Concerning single crystal reflectivity curves. *A. McL. Mathieson* 393

Accurate measurement of powder diffraction intensities using synchrotron radiation. *W. Parrish and M. Hart* 403

Accurate structure factor measurements by powder methods. *T. M. Sabine* 413

Redetermination of absolute structure factors for silicon at room and liquid nitrogen temperatures. *S. Cummings and M. Hart* 423

Accurate determination of structure factors by Pendellösung methods using white radiation. *T. Takama and S. Sato* 433

Non-systematic three-beam effects in dynamical electron diffraction and their use in determination of amplitude and phase of structure factors. *K. Marthinsen, H. Matsuhata, R. Høier and J. Gjønnes* 449

A summary of low-angle X-ray atomic scattering factors measured by the critical voltage effect in high energy electron diffraction. *A. G. Fox and R. M. Fisher* 461

Simple method for estimating the contribution of neighbouring n -beam interactions to two-beam structure factors. *H. J. Juretschke and H. K. Wagenfeld* 469

Measurement of thermal diffuse scattering using pulsed neutron diffraction.
B. T. M. Willis 477

Recent advances in the calculation and measurement of the X-ray dispersion corrections. *D. C. Creagh* 487

[Continued overleaf]

Experimental determination of scan-truncation losses from low-temperature (16 K) single-crystal X-ray measurements. *Riccardo Destro* 503

Effect of n -beam interaction. *A. Okazaki, H. Ohe and Y. Soejima* 511

Determination of structure factors by the Pendellösung effect for imperfect crystals. *N. M. Olekhnovich* 519

Australian Journal of Physics

A journal for the publication of original research in pure and applied physics

Contents Volume 41 Number 4 1988

Nuclear Physics

Experimental investigation and R -matrix analysis of low-lying levels in ^6He and ^6Li . *C. L. Woods, F. C. Barker, W. N. Catford, L. K. Fifield and N. A. Orr* 525

Atomic and Molecular Physics

Dependence of zero-field ion mobilities on well depth and minimum position in the ion-neutral interaction potential. *Peter W. Harland, Robert G. A. R. Maclagan and Richard W. Simpson* 545

Spectroscopic studies of the energy levels of the Nd^{3+} ion in single crystals of $\text{SrO} \cdot 6\text{Al}_2\text{O}_3$. *H. Tajalli* 549

Pseudopotential calculations for Li_2 , Na_2 and NaLi . *N. Andriopoulos and E. I. von Nagy-Felsobuki* 563

A study of the vibrational excitation of H_2 by measurements of the drift velocity of electrons in H_2 -Ne mixtures. *J. P. England, M. T. Elford and R. W. Crompton* 573

Fluids, Plasmas and Electric Discharges

An investigation of r.f. travelling wave current drive using the $\langle \vec{J} \times \vec{B} \rangle$ model. *W. K. Bertram* 587

Condensed Matter: Electronic Structure etc.

High- T_c superconductors: Evidence on the electron-phonon interaction from transport measurements. *A. B. Kaiser and C. Uher* 597

Effects of X-irradiation on the principal uranium centre in alkali fluorides. *W. A. Runciman and B. Srinivasan* 611

Cross-Disciplinary Physics

Thermal performance of solar collectors with EPDM absorber plates. *M. J. O'Keefe and J. L. A. Francey* 623

Australian Journal of Physics

A journal for the publication of original research in pure and applied physics

Contents Volume 41 Number 5 1988

General Physics

On the radiation from a rotating dipole. *Keith Briggs* 629

Nuclear Physics

Renormalisation of g-boson effects in an s-d-g boson model. *K. Amos, X. J. Chen, A. E. L. Dieperink and I. Morrison* 633

Atomic and Molecular Physics

Excitation of swift heavy ions in foil targets. IV. Preequilibrium energy losses and mean charge states. *L. B. Bridwell, H. J. Hay, L. F. Pender, C. J. Sofield and P. B. Treacy* 681

Electron impact ionisation of the ground state of He^+ . *K. K. Mukherjee, P. S. Mazumdar and S. Brajamani* 693

Momentum transfer cross section for electrons in krypton derived from measurements of the drift velocity in H_2 -Kr mixtures. *J. P. England and M. T. Elford* 701

Condensed Matter: Structure etc.

Accuracy in temperature factor determination in powder diffractometry. *G. Kimmel and W. N. Schreiner* 719

Geophysics, Astronomy and Astrophysics

The knee of the cosmic ray energy spectrum. *R. W. Clay* 729

Australian Journal of Physics

A journal for the publication of original research in pure and applied physics

Contents Volume 41 Number 6 1988

General Physics

Riemann–Hilbert problem with higher order poles for self-induced transparency with degenerate energy levels. *A. Roy Chowdhury and Mrityunjay De* 735

Nuclear Physics

Consistent description of unbound states observed in scattering and reactions. *F. C. Barker* 743

Fluids, Plasmas and Electric Discharges

A general physical model for RMF current drive. *W. N. Hugrass* 765

Condensed Matter: Structure etc.

Thermal expansion of Fe_2MnSi . *J. R. Miles, T. F. Smith and T. R. Finlayson* 781

Thermal expansion of willemite, Zn_2SiO_4 . *G. K. White and R. B. Roberts* 791

Condensed Matter: Electronic Structure etc.

Parametrisation of the LCAO bandstructure of BCC transition metals. *B. I. Craig and P. V. Smith* 797

Geophysics, Astronomy and Astrophysics

Lunisolar atmospheric tides: A new approach. *R. Brahde* 807

FLRW cosmological models in Lyra's manifold with time dependent displacement field. *A. Beesham* 833
