Systematics and Biogeography

Nuclear and plastid DNA sequences reveal complex reticulate patterns in Australian water-lilies
(*Nymphaea* subgenus *Anecphya*, Nymphaeaceae).

Cornelia Löhne, Thomas Borsch, Surrey W. L. Jacobs, C. Barre Hellquist and John H. Wiersema 229–250

Revision of *Spergularia* (Caryophyllaceae) in Australia.

Laurie G. Adams, Judy G. West and Kirsten J. Cowley 251–270

Variation in *Phebalium glandulosum* subsp. *glandulosum*: morphometric and anatomical evidence (Rutaceae).

Robyn L. Giles, Andrew N. Drinnan and Neville G. Walsh 271–288

In situ morphometric study of the *Diuris punctata* species complex (Orchidaceae), with implications for conservation.

Zoë F. Smith, Elizabeth A. James and Cassandra B. McLean 289–300

On the conflicting generic delineation in the *Onopordum* group (Compositae, Cardueae–Carduinae):
a combined nuclear and plastid molecular approach.

Núria Garcia-Jacas, Mercè Galbany-Casals, Kostyantyn Romashchenko and Alfonso Susanna 301–311
