

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 52, Issues 2–3, 2012, 73–196

APPLIED GENOMICS FOR SUSTAINABLE LIVESTOCK BREEDING

Foreword i

Sponsors ii

USING GENOMICS IN LIVESTOCK AGRICULTURE

Uses of genomics in livestock agriculture

M. E. Goddard 73–77

The use of genomics in the management of livestock

B. P. Kinghorn 78–91

Genomics and the global beef cattle industry

E. J. Pollak, G. L. Bennett, W. M. Snelling, R. M. Thallman and L. A. Kuehn 92–99

Beef cattle breeding in Australia with genomics: opportunities and needs

D. J. Johnston, B. Tier and H.-U. Graser 100–106

Designing dairy cattle breeding schemes under genomic selection: a review of international research

J. E. Pryce and H. D. Daetwyler 107–114

Genomic selection in French dairy cattle

D. Boichard, F. Guillaume, A. Baur, P. Croiseau, M. N. Rossignol, M. Y. Boscher, T. Druet, L. Genestout, J. J. Colleau, L. Journaux, V. Ducrocq and S. Fritz 115–120

Genome-wide selection in poultry

Rudolf Preisinger 121–125

Integration of genomic information into beef cattle and sheep genetic evaluations in Australia

Andrew A. Swan, David J. Johnston, Daniel J. Brown, Bruce Tier and Hans-U. Graser 126–132

FINDING SPECIFIC GENES

Next generation sequencing of African and Indicine cattle to identify single nucleotide polymorphisms

W. Barris, B. E. Harrison, S. McWilliam, R. J. Bunch, M. E. Goddard and W. Barendse 133–142

Finding genes for economically important traits: Brahman cattle puberty

M. R. S. Fortes, S. A. Lehnert, S. Bolormaa, C. Reich, G. Fordyce, N. J. Corbet, V. Whan, R. J. Hawken and A. Reverter 143–150

Chicks and single-nucleotide polymorphisms: an entrée into identifying genes conferring disease resistance in chicken

Hans H. Cheng, Sean MacEachern, Sugalesini Subramaniam and William M. Muir 151–156

Design and phenotyping procedures for recording wool, skin, parasite resistance, growth, carcass yield and quality traits of the SheepGENOMICS mapping flock

Jason D. White, Peter G. Allingham, Chris M. Gorman, David L. Emery, Philip Hynd, John Owens, Amy Bell, Jason Siddell, Greg Harper, Ben J. Hayes, Hans D. Daetwyler, Jonathan Usmar, Mike E. Goddard, John M. Henshall, Sonja Dominik, Heather Brewer, Julius H. J. van der Werf, Frank W. Nicholas, Robyn Warner, Chris Hofmyer, Terry Longhurst, Troy Fisher, Paul Swan, Rob Forage and V. Hutton Oddy 157–171

CREATING VALUE FROM GENOMICS

Industrial perspective: capturing the benefits of genomics to Irish cattle breeding

B. Wickham, P. Amer, D. P. Berry, M. Burke, S. Coughlan, A. Cromie, J. F. Kearney, N. Mc Hugh, S. McParland and K. O'Connell 172–179

A review of how dairy farmers can use and profit from genomic technologies

Jennie Pryce and Ben Hayes 180–184

Where in the beef-cattle supply chain might DNA tests generate value?

Alison L. Van Eenennaam and Daniel J. Drake 185–196
