

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 55, Issue 1, 2015, 1–132

Prediction of diet quality for sheep from faecal characteristics: comparison of near-infrared spectroscopy and conventional chemistry predictive models

D. G. Kneebone and G. McL. Dryden 1–10

An integrative assay to quantify the nutritional quality of the selected diet of two Mediterranean free-living deer by faecal-FT-NIRS

S. Tellado and C. Azorit 11–16

Effect of varying the proportion of molasses in the diet on intake, digestion and microbial protein production by steers

D. V. Tuyen, X. M. Tolosa, D. P. Poppi and S. R. McLennan 17–26

A 'protein bank' of *Lotus uliginosus* cv. Maku as an alternative to conventional protein supplements for weaned lambs grazing on natural pastures during summer and autumn

L. Piaggio, M. de J. Marichal and A. Pastorín 27–30

Factors affecting reproductive performance of dairy cows in a pasture-based, automatic milking system research farm: a retrospective, single-cohort study

S. Talukder, P. Celi, K. L. Kerrisk, S. C. Garcia and N. K. Dhand 31–41

Milking permission and milking intervals in a pasture-based automatic milking system

N. A. Lyons, K. L. Kerrisk and S. C. Garcia 42–48

Does producing more product over a lifetime reduce greenhouse gas emissions and increase profitability in dairy and wool enterprises?

Natalie A. Browne, Ralph Behrendt, Ross S. Kingwell and Richard J. Eckard 49–55

Effect of replacing dietary corn with beet pulp on energy partitioning, substrate oxidation and methane production in lactating dairy goats

C. Ibáñez, M. C. López, P. Criscioni and C. Fernández 56–63

Bio-economic modelling of decisions under yield and price risk for suckler cow farms

Simon Briner, Niklaus Lehmann and Robert Finger 64–73

Influence of cereal type and fat source on the performance and fat utilisation of broiler starters

P. Tanchaoenrat, V. Ravindran and G. Ravindran 74–79

Effect of inulin and mannan-oligosaccharides compared with zinc-bacitracin on growing performance, nutrient digestibility and hematological profiles of growing rabbits

Y. A. Attia, R. S. Hamed, A. E. Abd El-Hamid, H. A. Shahba and F. Bovera 80–86

Effects of different concentrations of ground oak acorn on growth performance, blood parameters and carcass characteristics of goat kids

E. Froutan, O. Azizi, G. Sadeghi, F. Fatehi and S. Lashkari 87–92

Outcomes of gestation length in relation to farrowing performance in sows and daily weight gain and metabolic profiles in piglets

D. Mota-Rojas, R. Fierro, P. Roldan-Santiago, H. Orozco-Gregorio, M. González-Lozano, H. Bonilla, R. Martínez-Rodríguez, R. García-Herrera, P. Mora-Medina, S. Flores-Peinado, M. Sánchez and R. Ramírez-Necoechea 93–100

A genetic study on sexual dimorphism of bodyweight in sheep

Farhad Ghafouri-Kesbi, Ghodratollah Rahimi Mianji, ZARBAKHT Ansari Pirsarai, Seyed Hasan Hafezian, Hasan Baneh and Bijan Soleimani 101–106

Effect of dietary ellagic acid supplementation on semen quality parameters in chickens

M. Shanmugam and S. V. Rama Rao 107–112

Effect of processing time on the quality of dry-cured ham obtained from a native pig breed (Chato Murciano)

Eva Salazar, Adela Abellán, José M. Cayuela, Ángel Poto, Francisco Girón, Pilar Zafrilla and Luis Tejada 113–121

A comparison of deterministic and stochastic models for predicting the impacts of different sheep body lice (*Bovicola ovis*) management practices

Brian J. Horton and Anna L. Carew 122–132
