

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 55, Issue 3, 2015, 247–425

THE MEAL DYNAMICS OF GRAZING HERBIVORES

Foreword iii

Feeding behaviour in ruminants: a consequence of interactions between a reward system and the regulation of metabolic homeostasis

C. Ginane, M. Bonnet, R. Baumont and D. K. Revell 247–260

Understanding and manipulating diet choice in grazing animals

J. J. Villalba, F. D. Provenza, F. Catanese and R. A. Distel 261–271

Translating physiological signals to changes in feeding behaviour in mammals and the future effects of global climate change

B. D. Moore, N. L. Wiggins, K. J. Marsh, M. D. Dearing and W. J. Foley 272–283

Spatial and temporal domains of scale of grazing cattle

S. Larson-Praplan, M. R. George, J. C. Buckhouse and E. A. Laca 284–297

Effect of terrain heterogeneity on feeding site selection and livestock movement patterns

D. W. Bailey, M. B. Stephenson and M. Pittarello 298–308

How French shepherds create meal sequences to stimulate intake and optimise use of forage diversity on rangeland

M. Meuret and F. Provenza 309–318

Can animal performance be predicted from short-term grazing processes?

P. C. F. Carvalho, C. Bremm, J. C. Mezzalana, L. Fonseca, J. K. da Trindade, O. J. F. Bonnet, M. Tischler, T. C. M. Genro, C. Nabinger and E. A. Laca 319–327

Behavioural adaptation of grazing dairy cows to changes in feeding management: do they follow a predictable pattern?

P. Chilibrste, M. J. Gibb, P. Soca and D. A. Mattiauda 328–338

Continuous bite monitoring: a method to assess the foraging dynamics of herbivores in natural grazing conditions

O. J. F. Bonnet, M. Meuret, M. R. Tischler, I. M. Cezimbra, J. C. R. Azambuja and P. C. F. Carvalho 339–349

The catastrophe of meal eating

J. M. Forbes and P. Gregorini 350–359

Modelling preference and diet selection patterns by grazing ruminants: a development in a mechanistic model of a grazing dairy cow, MINDY

P. Gregorini, J. J. Villalba, F. D. Provenza, P. C. Beukes and J. M. Forbes 360–375

Temporal dynamics in the foraging decisions of large herbivores

D. Fortin, J. A. Merkle, M. Sigaud, S. G. Cherry, S. Plante, A. Drolet and M. Labrecque 376–383

Optimising the interrelationship between intake per cow and intake per hectare

A. J. Romera and G. J. Doole 384–396

Managing the herbage utilisation and intake by cattle grazing rangelands

J. W. Oltjen and S. A. Gunter 397–410

Synthesis: foraging decisions link plants, herbivores and human beings

F. D. Provenza, P. Gregorini and P. C. F. Carvalho 411–425
