

# ANIMAL PRODUCTION SCIENCE

**CONTENTS** Volume 58, Issue 12, 2018, 2167–2368

## Perspectives on Animal Biosciences

Global beef cattle methane emissions: yield prediction by cluster and meta-analyses

*D. J. Cottle and R. J. Eckard* 2167–2177

## Genetics and Genomics

Inbreeding effects on some reproductive traits in Markhoz goats

*P. Mahmoudi, A. Rashidi and M. Razmkabir* 2178–2183

## Physiology, Endocrinology and Reproduction

The effect of fasting on the appetite-associated factors and energy sensors expression in the hypothalamus of different TI broilers

*Lili Sun, Jie Liu, Ping Tian, Yingdong Ni and Ruqian Zhao* 2184–2191

Effects of tonic immobility and corticosterone on mitochondria metabolism in pectoralis major muscle of broiler chickens

*Yujing Duan, Lili Sun, Jie Liu, Wenyan Fu, Song Wang, Yingdong Ni and Ruqian Zhao* 2192–2199

Effect of the acute heat stress on serum endotoxin concentration and the expression of TLR4 mRNA in liver of Arbor Acres broiler chickens

*Shu-cheng Huang, Ya-Fen Fu, Mujeeb Ur Rehman, Kun Li, Yan-fang Lan, Wei Liu, Hou-qiang Luo, Hui Zhang, Li-hong Zhang, Ya-nan Hao and Zong-xi Tong* 2200–2206

Recombinant bovine somatotropin on heifer's biometric measures, bodyweight, blood metabolites, and dry matter intake predictions

*Jefferson R. Gandra, Euclides R. Oliveira, Caio S. Takiya, Tiago A. Del Valle, Erika R. S. Gandra, Rafael Henrique T. B. Goes, Natyaro D. Orbach and Gessica Cristina G. Rodrigues* 2207–2214

## Nutrition and Metabolism

Feeding wet distillers grains plus solubles contributes to sarcoplasmic reticulum membrane instability

*M. D. Chao, K. I. Domenech-Perez, L. S. Senaratne-Lenagala and C. R. Calkins* 2215–2223

Effect of initial time of forage supply on growth and rumen development in preweaning calves

*X. Y. Lin, Y. Wang, J. Wang, Q. L. Hou, Z. Y. Hu, K. R. Shi, Z. G. Yan and Z. H. Wang* 2224–2232

Protein dietary efficiency and methane emission in cattle fed soybean meal treated with tannins

*R. Mezzomo, P. V. R. Paulino, M. M. Barbosa, T. S. Martins, L. G. R. Pereira, J. C. Silva, M. F. Paulino, M. C. Silva and N. V. Serão* 2233–2241

The effects of partial substitution of soybean with urea or slow-release urea on finishing performance, meat quality, and digestion parameters of Nellore steers

*R. R. Corte, F. O. Brito, P. R. Leme, A. S. C. Pereira, J. E. Freitas Jr, F. P. Rennó, S. L. Silva, L. O. Tedeschi and J. C. M. Nogueira Filho* 2242–2248

## Feed Quality, Nutritional Value and Toxicology

Inoculant effects on the fermentation quality, chemical composition and saponin content of lucerne silage in a mixture with wheat bran or corn husk

*Jipeng Tian, Risu Na, Zhu Yu, Zhongkuan Liu, Zhenyu Liu and Yidong Yu* 2249–2257

Effect of individual Ayurveda plants and mixtures thereof on *in vitro* ruminal fermentation, methane production and nutrient degradability

*S. Wang, A. Müller, D. Hilfiker, S. Marquardt, M. Kreuzer, U. Braun and A. Schwarm* 2258–2268

Tedera proves its value as a summer and autumn feed for sheep in Mediterranean-like climates

*D. Real, C. M. Oldham, A. van Burgel, E. Dobbe and J. Hardy* 2269–2279

*Continued on next page*

Performance, hepatic function and efficiency of nutrient utilisation of grazing dairy cows supplemented with alkaline-treated *Jatropha curcas* L. meal

*Jocely G. Souza, Lucas M. G. Olini, Claudio V. Araujo, Simone Mendonça, Joanis T. Zervoudakis, Luciano S. Cabral, Ibukun M. Ogunade and André S. Oliveira* 2280–2287

Effects of forage type and age at which forage provision is started on growth performance, rumen fermentation, blood metabolites and intestinal enzymes in Holstein calves

*Z. H. Wu, A. Azarfar, A. Simayi, S. L. Li, A. Jonker and Z. J. Cao* 2288–2299

*In vitro* acidification potential and fermentation pattern of cereal grains incubated with inoculum of animals given forage or concentrate-based diets

*Z. Amanzougarene, S. Yuste, C. Castrillo and M. Fondevila* 2300–2307

The effect of feed protein content on the uniformity of production in laying hens

*Hilda Cristina Palma Bendezu, Nilva Kazue Sakomura, Euclides Braga Malheiros, E. P. Silva and Robert Mervyn Gous* 2308–2313

### **Behaviour, Well-being and Health**

Feed resource selection by Criollo goats browsing a tropical deciduous forest

*J. Ventura-Cordero, P. G. González-Pech, C. A. Sandoval-Castro, J. F. J. Torres-Acosta and J. Tun-Garrido* 2314–2320

Effects of different road conditions on rectal temperature, behaviour and traumatic injuries during transportation of different crosses of temperate/tropical breeds of heifers

*N. S. Minka and J. O. Ayo* 2321–2328

### **Environment, Production Systems and Management**

Using highly nutritious pastures to mitigate enteric methane emissions from cattle grazing systems in South America

*Y. Dini, J. I. Gere, C. Cajarville and Verónica S. Ciganda* 2329–2334

### **Meat Science and Product Quality**

Carcass lean-yield effects on the fatty acid and amino acid composition of Duroc pork and its technological quality after vacuum-aging

*J. Álvarez-Rodríguez, R. Ros-Freixedes, S. Gol, E. Henríquez-Rodríguez, R. N. Pena, L. Bosch, J. Estany, F. Vilaró and M. Tor* 2335–2343

The effects of dry or wet aging on the quality of the longissimus muscle from 4-year-old Hanwoo cows and 28-month-old Hanwoo steers

*Jungmin Oh, Hyun Jung Lee, Hyun Choel Kim, Hyun Joo Kim, Yeong Gwon Yun, Kwan Tae Kim, Yang Il Choi and Cheorun Jo* 2344–2351

Physicochemical properties of horse meat as affected by breed, sex, age, muscle type and aging period

*Ana Kaić, Silvester Žgur, Barbara Luštrek and Klemen Potočnik* 2352–2357

Effect of freezing on the quality of meat from broilers raised in different rearing systems

*A. Giampietro-Ganeco, J. L. M. Mello, R. A. Souza, F. B. Ferrari, B. M. Machado, P. A. Souza and H. Borba* 2358–2368
