

ANIMAL PRODUCTION SCIENCE

CONTENTS Volume 59, Issue 3, 2019, 401–600

Perspective

The importance of selection and reporting of the sex of experimental animals

Anthony Rowe 401–407

Genetics and Genomics

Effect of glycerin supplementation on the expression of antioxidant and mitochondrial genes in broilers

R. S. Araiijo, K. R. S. Sousa, F. C. B. Sousa, A. C. Oliveira, L. R. B. Dourado, S. E. F. Guimarães, W. Silva, D. Biagiotti, G. F. V. Bayão and A. C. Araujo 408–415

Effect of strain and age on the thick-to-thin albumen ratio and egg composition traits in layer hens

Yi Wan, Sihua Jin, Chendong Ma, Zhicheng Wang, Qi Fang and Runshen Jiang 416–419

Physiology, Endocrinology and Reproduction

Modelling the egg components and internal cycle length of laying hens

H. C. P. Bendezu, N. K. Sakomura, E. B. Malheiros, R. M. Gous, N. T. Ferreira and J. B. K. Fernandes 420–426

Influence of light sources on body characteristics of female Japanese quail (*Coturnix coturnix japonica*) in different reproductive ages

M. F. Bobadilla-Mendez, E. A. Cañas-Mendoza, L. M. Batista, P. L. Retes, L. G. Ferreira, S. A. P. Alcebiades, L. V. Teixeira, R. R. Alvarenga, E. J. Fassani and M. G. Zangeronimo 427–434

Nutrition and Metabolism

Energy partitioning at low temperatures in broiler breeders

M. K. Nonis and R. M. Gous 435–440

Variation in methane production over time and physiological state in sheep

V. H. Oddy, A. J. Donaldson, M. Cameron, J. Bond, S. Dominik and D. L. Robinson 441–448

Metabolic and production responses to calcidiol treatment in mid-lactation dairy cows

R. M. Rodney, P. Celi, J. J. McGrath, H. M. Golder, S. T. Anderson, D. M. McNeill, D. R. Fraser and I. J. Lean 449–460

Diphenyl diselenide subcutaneous supplementation of dairy sheep: effects on oxidant and antioxidant status, inflammatory response and milk composition

Angelisa H. Biazus, Chrystian J. Cazarotto, Gustavo Machado, Nathieli B. Bottari, Mariana S. Alves, Vera M. Morsch, Maria R. C. Schetinger, Marta L. R. Leal, Natieli F. Fernandes, Rafael N. Moresco, Matheus D. Baldissera and Aleksandro S. Da Silva 461–470

Effects of fibrolytic enzymes and isobutyrate on ruminal fermentation, microbial enzyme activity and cellulolytic bacteria in pre- and post-weaning dairy calves

C. Wang, Q. Liu, G. Guo, W. J. Huo, Y. X. Wang, Y. L. Zhang, C. X. Pei and S. L. Zhang 471–478

Feed Quality, Nutritional Value and Toxicology

A new cactus variety for dairy cows in areas infested with *Dactylopius opuntiae*

C. C. F. Monteiro, M. A. Ferreira, A. S. C. Vêras, S. I. Guido, M. P. Almeida, R. C. Silva and J. G. Inácio 479–485

Brown-midrib corn silage in finishing steer diet: effects on animal performance, *in vivo* digestibility and ruminal kinetics disappearance

M. J. Spetter, F. A. Ramiro, M. M. Della Rosa, C. S. Maglietti, J. G. Depetris, F. J. Santini, J. P. Raimondi, J. M. Roig and E. Pavan 486–492

Recovery of ovulation rate in ewes following their removal from an oestrogenic lucerne forage

R. L. Fields, D. J. Moot, J. R. Sedcole and G. K. Barrell 493–498

Continued on next page

The effect of silage type on animal performance, energy utilisation and enteric methane emission in lactating dairy cows

M. Günal, A. McCourt, Y. Zhao, Z. G. Yan and T. Yan 499–505

Effect of wheat adaptation strategies on rumen parameters and dry matter intake of late lactation dairy cows

V. M. Russo, B. J. Leury, E. Kennedy, M. C. Hannah, M. J. Auldist and W. J. Wales 506–514

Effects of nitrate supplementation and forage level on gas production, nitrogen balance and dry-matter degradation in sheep

M. Sharifi, A. Taghizadeh, A. A. Khadem, A. Hosseinkhani and H. Mohammadzadeh 515–523

Low-tannin white sorghum contains more digestible and metabolisable energy than high-tannin red sorghum if fed to growing pigs

Long Pan, Xiaokang Ma, Jiangxu Hu, Li Liu, Mingfeng Yuan, Ling Liu, Defa Li and Xiangshu Piao 524–530

Effect of ractopamine on digestible-lysine requirement for finishing barrows under thermoneutral conditions

M. F. Souza, J. L. Donzele, F. C. O. Silva, R. F. M. O. Donzele, E. F. Cardoso, D. A. M. Braga, L. F. Faria and T. V. Mauricio 531–542

Behaviour, Well-being and Health

Barley grain supplementation in late gestation to twin-bearing Merino ewes grazing high-biomass and high-quality pasture does not increase lamb survival

K. J. Kopp, S. M. Robertson and M. A. Friend 543–548

Farmed red deer home range, habitat use and daily movement patterns in a Southland, New Zealand, tussock grassland over calving and lactation

A. J. Wall, G. W. Asher, M. S. Netzer, M. G. H. Johnson, K. T. O'Neill, R. P. Littlejohn and N. Cox 549–563

Effect of a buccal meloxicam formulation on the behavioural response to ring castration of calves

Mhairi A. Sutherland, Arianne L. Bright and Karin E. Schütz 564–569

Environment, Production Systems and Management

Comparison of milk production and herd characteristics in New Zealand herds milked once or twice a day

J. P. Edwards 570–580

pH: a promising indicator of feed waste in piggery effluent?

Chris Pratt, Jaye Hill, Alan Skerman and Matthew Redding 581–592

Meat Science and Product Quality

Effects of concentrates rich in by-products on growth performance, carcass characteristics and meat quality traits of light lambs

C. Avilés Ramírez, F. Peña Blanco, A. Horcada Ibáñez, N. Núñez Sánchez, F. Requena Domenech, P. Guzmán Medina and A. L. Martínez Marín 593–599

Corrigendum 600–600
