Contents

Text S1: Nexus file for the phylogenetic tree of the eucalypts

Figure S1: Phylogeny of *Angophora*, *Corymbia*, and *Eucalyptus* containing 469 terminal taxa, showing dimorphism indexes for each trait in all species where data was available.

Figure S2: Graphs showing phylogenetic residuals of dimorphism index (DI) versus leaf area index (LAI) for three leaf traits: size, aspect ratio, and leaf mass per area (LMA).

Text S1: Nexus file for the phylogenetic tree of the eucalypts
