

AUSTRALIAN JOURNAL OF CHEMISTRY

AN INTERNATIONAL JOURNAL FOR CHEMICAL SCIENCE

Volume 73 Number 8 2020

CONTENTS

PhysChem 2019

Guest Editor: Duncan Wild

PhysChem 2019: RACI Australian Conference on Physical Chemistry, Perth, 11–14 February 2019

D. A. Wild **665**

New Perspectives on Photosystem II Reaction Centres

J. Hall, R. Picorel, N. Cox, R. Purchase, E. Krausz **669**

Predicting Octanol–Water Partition Coefficients of Fluorinated Drug-Like Molecules: A Combined Experimental and Theoretical Study

Y. M. Wu, Y. L. Salas, Y. C. Leung, L. Hunter, J. Ho **677**

‘Live and Large’: Super-Resolution Optical Fluctuation Imaging (SOFI) and Expansion Microscopy (ExM) of Microtubule Remodelling by Rabies Virus P Protein

A. M. Rozario, F. Zwettler, S. Duwé, R. B. Hargeaves, A. Brice, P. Dedecker, M. Sauer, G. W. Moseley, D. R. Whelan, T. D. M. Bell **686**

Evidence For a Water-Stabilised Ion Radical Complex: Photoelectron Spectroscopy and *Ab Initio* Calculations

T. R. Corkish, C. T. Haakansson, A. J. McKinley, D. A. Wild **693**

Electron Transfer in a Naphthalene Diimide System Studied by Single-Molecule Delayed Fluorescence

R. P. Cox, S. Sandanayake, S. J. Langford, T. D. M. Bell **699**

Barrierless Reactions of Three Benzonitrile Radical Cations with Ethylene

O. J. Shiels, P. D. Kelly, S. J. Blanksby, G. da Silva, A. J. Trevitt **705**

Density-Driven Correlations in Ensemble Density Functional Theory: Insights from Simple Excitations in Atoms

T. Gould, S. Pittalis **714**

Using Molecular Modelling to Understand and Predict the Impact of Organic Additives as Crystal Growth Modifiers

F. Jones, A. L. Rohl **724**

Effects of Hydrogen Bonding on the Rotational Dynamics of Water-Like Molecules in Liquids: Insights from Molecular Dynamics Simulations

W. A. M. Madhavi, S. Weerasinghe, K. I. Momot **734**

Diatomic Rovibronic Transitions as Potential Probes for Proton-to-Electron Mass Ratio Across Cosmological Time

A.-M. Syme, A. Mousley, M. Cunningham, L. K. McKemmish **743**

Electronic Wavefunction Tiles

Y. Liu, T. J. Frankcombe, T. W. Schmidt **757**

A Detailed Classification of Three-Centre Two-Electron Bonds

S. P. Gnanasekar, E. Arunan **767**

The Case for Methyl Group Precession Accompanying Torsional Motion

J. R. Gascooke, W. D. Lawrance **775**

Theoretical Investigation of Main-Group Element Hydride Insertion into Phosphorus-Heterocyclic Carbenes (PHCs)

K. H. M. Al Furaiji, A. Molino, J. L. Dutton, D. J. D. Wilson **787**

Utilizing the Combined Power of Theory and Experiment to Understand Molecular Structure – Solid-State and Gas-Phase Investigation of Morpholine Borane

A. M. Ja’o, D. A. Wann, C. D. Rankine, M. I. J. Polson, S. L. Masters **794**

Analysis of Nanoconfined Protein Dielectric Signals Using Charged Amino Acid Network Models

L. Pacini, L. Bourgeat, A. Serghei, C. Lesieur **803**

Probing Intramolecular Interaction of Stereoisomers Using Computational Spectroscopy

F. Wang, S. Islam, F. Backler **813**

Corrigendum

‘Live and Large’: Super-Resolution Optical Fluctuation Imaging (SOFI) and Expansion Microscopy (ExM) of Microtubule Remodelling by Rabies Virus P Protein

A. M. Rozario, F. Zwettler, S. Duwé, R. B. Hargeaves, A. Brice, P. Dedecker, M. Sauer, G. W. Moseley, D. R. Whelan, T. D. M. Bell **822**
