

Exploration Geophysics

Contents Volume 49 Issue 1 2018

Special Section: Marine Geophysics

Seismic imaging for an ocean drilling site survey and its verification in the Izu rear arc
Mikiya Yamashita, Narumi Takahashi, Yoshihiko Tamura, Seiichi Miura and Shuichi Kodaira 1–10

Study of the Nankai seismogenic fault using dynamic wave propagation modelling of digital rock from the Nobeoka Fault
Chandoeun Eng, Tatsunori Ikeda and Takeshi Tsuji 11–20

Robust data processing of noisy marine controlled-source electromagnetic data using independent component analysis
Naoto Imamura, Tada-nori Goto, Takafumi Kasaya and Hideaki Machiyama 21–29

Regular Papers

Traveltimes and conversion-point positions for P-SV converted wave propagation in a transversely isotropic medium: numerical calculations and physical model studies
Po-Yen Tseng, Young-Fo Chang, Chih-Hsiung Chang and Ruey-Chyuan Shih 30–41

Outliers-out stack: a new algorithm for processing seismic data
Mohamed Rashed 42–49

Seismic data decomposition and reconstruction with sparse Gaussian beams and sparse optimisation method
Peng Liu and Yanfei Wang 50–57

An efficient interpolation approach for insufficient 3D field data
Bona Kim, Soocheol Jeong, Joongmoo Byun and Young Kim 58–67

Multi-scale full waveform inversion for areas with irregular surface topography in an auxiliary coordinate system
Yingming Qu, Zhenchun Li, Jianping Huang and Jinli Li 68–80

Effect of ground undulation and mounted vehicle velocity variation on stepped frequency continuous wave GPR data
Smitha Nage Gowda, Deverakonda R. Ullas Bharadwaj, Sridhara Abilash, Saligrama N. Sridhara and Vipula Singh 81–88

Applying multi-wavelength, multi-polarimetric and interferometric airborne radar data for geological mapping in densely forested north-western Tasmania
Rob Hewson, David Green, Michael Vicary and Simon Jones 89–97

Regional magnetic lithologies and structures as controls on porphyry copper deposits: evidence from Iran
Hassan Kheyrollahi, Firouz Alinia and Abdolreza Ghods 98–110

New constraints on the neotectonic stress pattern of the Flinders and Mount Lofty Ranges, South Australia
Mojtaba Rajabi, Mark Tingay, Oliver Heidbach, David Belton, Natalie Balfour and Betina Bendall 111–124

Corrigendum to New constraints on the neotectonic stress pattern of the Flinders and Mount Lofty Ranges, South Australia
Mojtaba Rajabi, Mark Tingay, Oliver Heidbach, David Belton, Natalie Balfour and Betina Bendall 125
