

Exploration Geophysics

Contents Volume 49 Issue 3 2018

Noise reduction of grounded electrical source airborne transient electromagnetic data using an exponential fitting-adaptive Kalman filter

Yanju Ji, Qiong Wu, Yuan Wang, Jun Lin, Dongsheng Li, Shangyu Du, Shengbao Yu and Shanshan Guan 243–252

Three-dimensional inversion of CSAMT data in the presence of topography

Changhong Lin, Handong Tan, Wangwang Wang, Tuo Tong, Miao Peng, Mao Wang and Weihua Zeng 253–267

Three-dimensional tensor controlled-source audio-frequency magnetotelluric inversion using LBFGS

Kunpeng Wang, Handong Tan, Changhong Lin, Jianlong Yuan, Cong Wang and Jing Tang 268–284

Mapping electrical structures in the southern Great Khingan Range, north-east China, through two-dimensional magnetotelluric sounding

Weijun Zhao, Shuwang Chen and Qiuhong Ding 285–298

Estimating high hydraulic conductivity locations through a 3D simulation of water flow in soil and a resistivity survey

Keisuke Inoue, Hiroomi Nakazato, Tomijiro Kubota, Koji Furue, Hiroshi Yoshisako,

Michiaki Konno and Daisuke Shoda 299–308

A novel approach to comparing AEM inversion results with borehole conductivity logs

Niels B. Christensen and Kenneth C. Lawrie 309–322

Regularisation parameter adaptive selection and its application in the prestack AVO inversion

Guangtan Huang, Jingye Li, Cong Luo and Xiaohong Chen 323–335

A robust surface-consistent residual phase correction method based on migrated gathers

Jincheng Xu, Hao Zhang and Jianfeng Zhang 336–344

3D seismic attributes for structural mapping and enhancement of deep gold mining:

a case study from the West Wits Line goldfields, South Africa

Nomqhele Z. Nkosi, Musa S. D. Manzi, Oleg Brovko and Raymond J. Durrheim 345–362

Azimuthal seismic responses from shale formation based on anisotropic rock physics

and reflectivity method: a case study from south-west China

Neng Lu, Cai Liu, Zhiqi Guo and Xiwu Liu 363–371

Study of Scholte wave dispersion curves and modal energy distribution using a wavefield numerical simulation method

Hua Wu, Guang-Zhou Shao and Qing-Chun Li 372–385

Acoustic wave propagation simulation by reduced order modelling

Hadi Mahdavi Basir, Abdolrahim Javaherian, Zaher Hossein Shomali,

Roohollah Dehghani Firouz-Abadi and Shaban Ali Gholamy 386–397

Regional and residual gravity anomaly separation using the singular spectrum analysis-based

low pass filtering: a case study from Nagpur, Maharashtra, India

K. Satish Kumar, Rekapalli Rajesh and Rama Krishna Tiwari 398–408

Enhancement of fault interpretation using multi-attribute analysis and artificial neural network (ANN) approach: a case study from Taranaki Basin, New Zealand

Priyadarshi Chinmoy Kumar and Animesh Mandal 409–424
