

> SCOPE

Australian Journal of Chemistry - an International Journal for Chemical Science publishes research papers from all fields of chemical science. Papers that are multidisciplinary or address new or emerging areas of chemistry are particularly encouraged. Thus, the scope is dynamic. It includes (but is not limited to) synthesis, structure, new materials, macromolecules and polymers, supramolecular chemistry, analytical and environmental chemistry, natural products, biological and medicinal chemistry, nanotechnology, and surface chemistry.

The publishing policy of Australian Journal of Chemistry is to select the most important papers with the broadest significance to the wider chemistry community. Papers containing little or no chemistry (including Chemical Education papers), and papers reporting incremental results that do not have sufficient originality and significance are not considered to be within the scope of the Journal, and are unlikely to be accepted.

> AUTHOR BENEFITS

- International reach and discoverability
- Eligible authors receive APC-free Open Access
- Indexing in a wide variety of relevant databases
- Professional copyediting for every paper
- Capture impact through citation tracking and Altmetrics
- Authors retain copyright
- Green Open Access with no embargo
- Gold Open Access compliant with major funders
- Rigorous characterisation of compounds

JOURNAL METRICS

> METRICS

These metrics are shared as a way of quantifying the impact this journal has on the research community. However, they should always be considered in the context of how they are calculated, and we emphasise that none of these journal-level metrics should be used to judge the impact of an individual article or author, or their research outputs.

> ABOUT CSIRO PUBLISHING

CSIRO Publishing operates as an editorially independent science publisher within Australia's premier research group, Commonwealth Scientific and Industrial Research Organisation (CSIRO), and has been publishing journals since 1948.

Our internationally recognised publishing program includes journals, books and magazines and covers a wide range of scientific disciplines.
