Australian Mammalogy is a major journal for the publication of research in all branches of mammalogy. The journal’s emphasis is on studies relating to Australasian mammals, both native and introduced, and includes marine mammals in the Antarctic region. Subject areas include, but are not limited to: anatomy, behaviour, developmental biology, ecology, evolution, genetics, molecular biology, parasites and diseases of mammals, physiology, reproductive biology, systematics and taxonomy. Australian Mammalogy is an ideal resource for professional mammalogists, research scientists, resource managers, consulting ecologists, students and amateurs interested in any aspects of the biology and management of mammals.

SCOPE

Australian Mammalogy supports its core practices and is committed to transparency in scholarly publishing.

AUTHOR BENEFITS

• Indexing in a wide variety of relevant databases
• Professional copyediting for every paper
• Capture impact through citation tracking and Altmetrics
• Authors retain copyright
• Green Open Access with no embargo
• Gold Open Access compliant with major funders
• No page charges
• Rapid online publication ahead of issue release

STAY IN CONTACT
