

FUNCTIONAL PLANT BIOLOGY

publish.csiro.au/fp

> SCOPE

Functional Plant Biology publishes research of a broad interest that advance our knowledge on mechanisms by which plants operate and interact with environment. Of specific interest are mechanisms and signal transduction pathways by which plants adapt to extreme environmental conditions such as high and low temperatures, drought, flooding, salinity, pathogens, and other major abiotic and biotic stress factors.

Functional Plant Biology also encourages submissions on emerging concepts and new tools in plant biology, and studies encompassing work from the molecular through whole plant to community scale.

> AUTHOR BENEFITS

- International reach and discoverability
- Indexing in a wide variety of relevant databases, including MEDLINE/PubMed
- Professional copyediting for every paper
- Capture impact through citation tracking and Altmetrics
- Authors retain copyright
- Green Open Access with no embargo
- Gold Open Access compliant with major funders
- No page charges
- Rapid online publication ahead of issue release
- Eligible authors receive APC-free Open Access

JOURNAL METRICS

> METRICS

These metrics are shared as a way of quantifying the impact this journal has on the research community. However, they should always be considered in the context of how they are calculated, and we emphasise that none of these journal-level metrics should be used to judge the impact of an individual article or author, or their research outputs.
