SCOPE

Marine and Freshwater Research is an international and interdisciplinary journal publishing research and reviews on all aquatic environments and subject areas. Environments range across groundwaters, wetlands, streams, estuaries, rocky shores, reefs and the open ocean. Subject areas include aquatic ecosystem processes such as nutrient cycling, biology, ecology, biogeochemistry, biogeography and phylogeography, hydrology, limnology, oceanography; toxicology, conservation and management; and ecosystem services.

The content of Marine and Freshwater Research addresses broad conceptual questions and investigations about the ecology and management of aquatic environments.

AUTHOR BENEFITS

- International reach and discoverability
- Indexing in a wide variety of relevant databases
- Professional copyediting for every paper
- Capture impact through citation tracking and Altmetrics
- Authors retain copyright
- Green and Gold Open Access compliant with major funders
- No page charges
- Online publication ahead of issue release
