SCOPE

Pacific Conservation Biology is an international journal publishing original research, reviews, perspectives and book reviews relevant to conservation biology and wildlife management in the Pacific region. Specific areas of interest include conservation of biological diversity, natural resource management and policy, feral animals and weeds, biosecurity, marine ecosystems in the Pacific, and policy and education relevant to biodiversity conservation or wildlife management. Emphasis is placed on management implications of research.

Pacific Conservation Biology provides an important forum for discussion on regional conservation issues, debate about management priorities, and dissemination of research results.

AUTHOR BENEFITS

- International reach and discoverability
- Indexing in a wide variety of relevant databases
- Professional copyediting for every paper
- Capture impact through citation tracking and Altmetrics
- Authors retain copyright
- Green and Gold Open Access compliant with major funders
- No page charges
- Rapid online publication ahead of issue release

COPE

As a member of the Committee on Publication Ethics (COPE), Pacific Conservation Biology supports its core practices and is committed to transparency in scholarly publishing.
CSIRO Publishing operates as an editorially independent science publisher within Australia’s premier research group, Commonwealth Scientific and Industrial Research Organisation (CSIRO), and has been publishing journals since 1948. Our internationally recognised publishing program includes journals, books and magazines and covers a wide range of scientific disciplines.
