

THE RANGELAND JOURNAL

publish.csiro.au/rj

> SCOPE

The Rangeland Journal publishes original work that makes a significant contribution to understanding the biophysical, social, cultural, economic, and policy influences affecting rangeland use and management throughout the world. Rangelands are defined broadly and include all environments where natural ecological processes predominate, and where values and benefits are based primarily on natural resources.

Articles may present the results of original research, contributions to theory or new conclusions reached from the review of a topic. All material must be well documented, critically analysed and objectively presented.

> AUTHOR BENEFITS

- International reach and discoverability
- Indexing in a wide variety of relevant databases
- Professional copyediting for every paper
- Capture impact through citation tracking and Altmetrics
- Authors retain copyright
- Green Open Access with no embargo
- Gold Open Access compliant with major funders
- No page charges
- Rapid online publication ahead of issue release
- Eligible authors receive APC-free Open Access

JOURNAL METRICS

> METRICS

These metrics are shared as a way of quantifying the impact this journal has on the research community. However, they should always be considered in the context of how they are calculated, and we emphasise that none of these journal-level metrics should be used to judge the impact of an individual article or author, or their research outputs.
