› SCOPE
Research papers in Animal Production Science focus on improving livestock and food production, and on the social and economic issues that influence primary producers. The journal is mainly concerned with domesticated animals, however contributions on horses and wild animals may also be published. Animal Production Science publishes the highest quality original contributions dealing with animal breeding and genetics; animal nutrition and reproduction; livestock farming systems, sustainability and natural resource management; meat science and consumer acceptability; behaviour, health and welfare; and feed quality and nutritional value.

› AUTHOR BENEFITS
• International reach and discoverability
• Indexing in a wide variety of relevant databases
• Professional copyediting for every paper
• Capture impact through citation tracking and Altmetrics
• Authors retain copyright
• Open Access options compliant with major funding bodies
• No page charges
• Online Early publication ahead of issue release with DOIs for immediate citation
