

## Corrigendum

Volume 45, Number 3

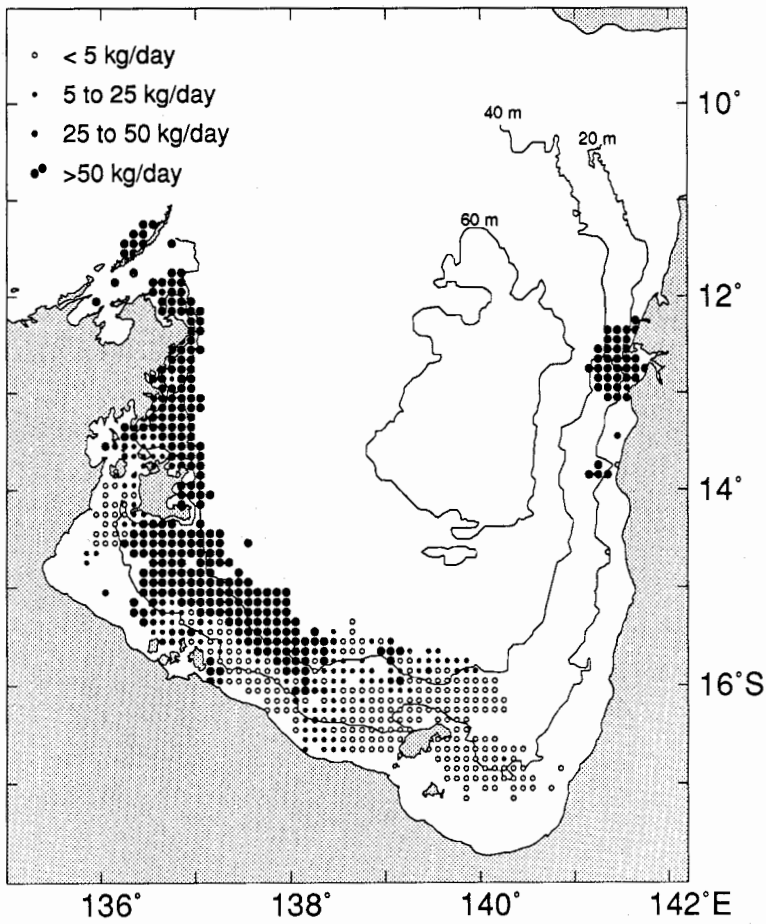

Species composition and distribution of commercial penaeid prawn catches in the Gulf of Carpentaria, Australia, in relation to depth and sediment type.

*Ian F. Somers*

Figs 4 and 6. These two figures were misnumbered, with the result that they were juxtaposed in the paper as published. They should have appeared as shown below.

**Fig. 4.** Estimated catch per unit effort ( $\text{kg day}^{-1}$ ) for the brown tiger prawn *Penaeus esculentus* in the Gulf of Carpentaria between 1983 and 1991. Symbols are given for grid squares where at least 10 vessels had fished for tiger, endeavour and/or king prawns.

**Fig. 6.** Estimated catch per unit effort (kg day<sup>-1</sup>) for the grooved tiger prawn *Penaeus semisulcatus* in the Gulf of Carpentaria between 1983 and 1991. Symbols are given for grid squares where at least 10 vessels had fished for tiger, endeavour and/or king prawns.
