

Index to Volume 29

Numbers prefixed by S are Astrophysical Supplement numbers

- Achuthan, P.—
See Chandramohan, T. 347
- Allen, B. J.—
See Musgrove, A. R. de L. 157
- Amos, K., Nesci, P., and Smith, R.—
 Direct reaction inelastic proton scattering
 from ^{20}Ne 233
- Astronomy*
 Evolutionary model for quasars 97
 Optical identifications for sources from
 Parkes 2700 MHz survey S39
See also Radio astronomy
- Astrophysics*
 Combined effect of rotation and magnetic
 field on finite-amplitude thermal convec-
 tion with hexagonal planform 305
 Polarization limiting region—an empty
 concept 343
 Structure and dynamic instability of
 isothermal relativistic star clusters 311
- Bajaj, P. D.—
See Bhati, S. S. 405
- Banerjee, A.—
See Chakravarty, N. 113
- Banerjee, A., Chakravarty, N., and Dutta
 Choudhury, S. B.—
 On stationary distributions of charged
 dust 119
- Barium: keV neutron resonance capture in
 ^{137}Ba 157
- Barker, F. C., Crawley, G. M., Miller, P. S.,
 and Steele, W. F.—
 The ghost anomaly in the $^9\text{Be}(p, d)^8\text{Be}$
 reaction 245
- Batty, M. J.—
 A search for recombination line emission
 from the galactic equator at
 408 MHz 419
- Beale, D. J.—
See Southon, J. R. 355
- Bhati, S. S., Singh, Nirmal, Bajaj, P. D.,
 and Trehan, P. N.—
 Gamma ray intensity and angular correla-
 tion measurements in ^{160}Dy 405
- Boldeman, J. W.—
See Musgrove, A. R. de L. 157
- Bolton, J. G.—
See Wall, J. V. S39
- Bömers, M. C.—
See Hudson, P. R. W. 25
- Borikar, S. M.—
See Karade, T. M. 465
- Branford, D., Carlson, L. E., Huang, F. C. P.,
 Gardner, N., Ophel, T. R., and Wright,
 I. F.—
 A search for an excited $K^\pi = 0^+$
 rotational band in ^{24}Mg 139
- Bransden, B. H., and Noble, C. J.—
 On the semi-classical method for electron
 scattering by atoms 165
- Butler, P. W.—
See McGee, R. X. 329
- Carlson, L. E.—
See Branford, D. 139
- Chakravarty, N.—
See Banerjee, A. 119
- Chakravarty, N., Dutta Choudhury, S. B.,
 and Banerjee, A.—
 Nonstatic spherically symmetric solutions
 for a perfect fluid in general
 relativity 113
- Chandramohan, T., and Achuthan, P.—
 The reaction $e^+e^- \rightarrow \eta'(X^0)\gamma$ and the
 new vector mesons 347
- Chaplin, D. H.—
See Wilson, G. V. H. 395
- Clarke, J. N., Little, A. G., and Mills, B. Y.—
 The Molonglo radio source catalogue 4:
 The Magellanic Cloud region S40
 Abstract to S40 471
- Cobalt: energy spectrum of ^{60}Ni recoils
 from ^{60}Co β decay 149
- Cook, J. L., Rose, E. K., and Trimble,
 G. D.—
 Fission product mass yield curves and
 their energy dependence 125
- Cosmic rays: hysteresis of primaries
 associated with Forbush decreases 89
- Cosmology*
 Effects of rotation on a test particle in
 NUT field 107
 Evolutionary model for quasars 97
 Massive scalar field: source of graviton
 and 'strong gravity' 195
 Nonstatic spherically symmetric solutions
 for a perfect fluid 113
 Stationary distributions of charged
 dust 119

- Variation in magnetic field strength during anisotropic gravitational collapse 461
- Vorticity of perfect fluid undergoing gravitational collapse 413
- Crawley, G. M.—
See Barker, F. C. 245
- Davidson, W.—
See Zotov, Natalia V. 97
- Dewar, R. L.—
The magnetic field of a current loop encircling an axisymmetric iron core 1
- Dexter, P. E.—
See Ward, J. F. 183
- Dickel, John R., and Milne, D. K.—
Magnetic fields in supernova remnants 435
- Dutta Choudhury, S. B.—
See Banerjee, A. 119
Chakravarty, N. 113
- Dysprosium: γ -ray intensity and angular correlation measurements in ^{160}Dy 405
- Electromagnetism: magnetic field of current loop encircling an axisymmetric iron core 1
- Electron scattering by atoms, semi-classical method for 165
- Europium ions in host crystals, spin-Hamiltonian parameters for 263
- Fackerell, Edward D., and Soffern, Kevin G.—
The structure and dynamic instability of isothermal relativistic star clusters 311
- Ferromagnetism*
Extended theory of magnon sideband shapes 273, 289
Theory of temperature modulation studies of ferromagnetic materials 395
- Fyans, R. A.—
See Hudson, P. R. W. 25
- Gardner, F. F., Robinson, B. J., and Sinclair, M. W.—
Observations of interstellar CH at 9 cm wavelength 211
- Gardner, N.—
See Branford, D. 139
- Gaseous electronics: nonlinear diffusion of ions in finite enclosures 171
- Gell-Mann, M.—
The world as quarks, leptons and bosons 473
- Geomagnetic pulsations, large amplitude Pc5, some characteristics of 67
- Gibbs, E. E.—
See Hudson, P. R. W. 19
- Gohel, V. B., and Jani, A. R.—
On the extended forms of phenomenological models for the lattice dynamics of b.c.c. transition metals 31
- Green, H. S.—
Generalized statistics and the quark model 483
- Gupta, Jagdish Chandra—
Some characteristics of large amplitude Pc5 pulsations 67
- Hanna, Stanley S.—
Giant resonances 511
- Henderson, J. R., and Lekner, J.—
A collective rotational state of spherical nuclei 363
- Hora, Heinrich—
Distinguishing between thermalizing and electrodynamic coupling for laser-compressed thermonuclear reactions 375
- Huang, F. C. P.—
See Branford, D. 139
- Hudson, P. R. W., Bömers, M. C., and Fyans, R. A.—
How isotopes obscure the anisotropic phonon Umklapp scattering in dielectrics 25
- Hudson, P. R. W., and Gibbs, E. E.—
Analysis of the effect of resonant phonon scattering on the thermal conductivity of CaF_2 19
- Hydrodynamics: propagation of spherical vortices 61
- Irshad, Jawaid—
See Saleem, M. 227
- Jani, A. R.—
See Gohel, V. B. 31
- Janzen, G.—
Geometry factors for TE_{0mn} resonance cavities for diagnostics of large-diameter plasmas 389
- Karade, T. M., and Borikar, S. M.—
Effect of Voigt-Palacios-Gordon transformations on thermodynamic quantities 465
- Karade, T. M., and Rao, J. R.—
Effects of rotation on a test particle in the NUT field 107
- Kumar, Vinod, and Sharma, A. P.—
Comments on the statistical distribution of grain sizes and grain density in G-5 nuclear emulsions 51
- Laser, inhomogeneously broadened, effect of relaxation parameters on quantum theory of 13

- Lekner, J.—
 See Henderson, J. R. 363
- Little, A. G.—
 See Clarke, J. N. S40
- McCarthy, I. E.—
 Breakup reactions at intermediate energy 561
- McGee, R. X., Newton, Lynette M., and Butler, P. W.—
 Radio continuum of the Small Magellanic Cloud at wavelengths 6 and 3.4 cm 329
- Macklin, R. L.—
 See Musgrove, A. R. de L. 157
- Magnesium: $K^\pi = 0^+$ rotational band in ^{24}Mg 139
- Manton, M. J.—
 The propagation of spherical vortices 61
- Mason, D. P.—
 Variation in magnetic field strength during a specific anisotropic gravitational collapse 461
 Vorticity of a perfect fluid undergoing a gravitational collapse 413
- Millar, D. D.—
 Ion currents, ion-neutral collisions and plasma transport phenomena 249
- Miller, P. S.—
 See Barker, F. C. 245
- Mills, B. Y.—
 See Clarke, J. N. S40
- Milne, D. K.—
 See Dickel, John R. 435
- Milne, R. G.—
 Interplanetary scintillation power spectra 201
- Mohanty, B. K., and Nayak, N.—
 Effect of relaxation parameters on the quantum theory of an inhomogeneously broadened laser 13
- Murphy, George L.—
 Mach's principle in nonsymmetric field theories 469
- Musgrove, A. R. de L., Allen, B. J., Boldeman, J. W., and Macklin, R. L.—
 keV neutron resonance capture in barium-137 157
- Newman, D. J.—
 Analysis of Eu^{2+} spin-Hamiltonian parameters 263
 Crystal field effects in S-state ions due to exchange polarization 177
- Newton, Lynette M.—
 See McGee, R. X. 329
- Noble, C. J.—
 See Bransden, B. H. 165
- Nuclear physics*
 Angular correlations in ^{19}O 355
 Breakup reactions at intermediate energy 561
 Collective rotational state of spherical nuclei 363
 Direct reaction inelastic proton scattering from ^{20}Ne 233
 Dual absorptive model and π^-p backward elastic scattering 227
 Electron-positron annihilation and new vector mesons 347
 Electron scattering and photonuclear reactions at MIT Bates linac 573
 Energy spectrum of ^{60}Ni recoils from ^{60}Co β decay 149
 Fission product mass yield curves and energy dependence 125
 γ -ray intensity and angular correlation measurements in ^{160}Dy 405
 Gauge theories of weak, electromagnetic and strong interactions 473
 Generalized statistics and quark model 483
 Ghost anomaly in $^9\text{Be}(p, d)^8\text{Be}$ 245
 Giant resonances 511
 keV neutron capture in ^{137}Ba 157
 Nuclear sum rules, electron scattering and giant resonances 499
 Prompt lepton production 231
 Search for excited $K^\pi = 0^+$ rotational band in ^{24}Mg 139
 Statistical concepts in particle physics 489
 Statistical distribution of grain sizes and density in G-5 nuclear emulsions 51
 Thermalizing and electrodynamic coupling for laser-compressed thermonuclear reactions 375
- Ophel, T. R.—
 See Branford, D. 139
- Oxygen: angular correlations in ^{19}O 355
- Peaslee, D. C.—
 Note on prompt lepton production 231
 Statistical concepts in particle physics 489
- Nayak, B. K.—
 See Rao, J. R. 195
- Nayak, N.—
 See Mohanty, B. K. 13
- Neon: direct reaction inelastic proton scattering from ^{20}Ne 233
- Nesci, P.—
 See Amos, K. 233

Plasma physics

- Geometry factors for TE_{0mn} resonators for large-diameter plasmas 389
- Ion currents, ion-neutral collisions and plasma transport phenomena 249
- Magnetic field of current loop encircling axisymmetric iron core 1
- Thermalizing and electrodynamic coupling for laser-compressed thermonuclear reactions 375

Poletti, A. R.—

See Southon, J. R. 355

Radar: long-range ocean surface studies using backscatter via ionosphere 183

Radio astronomy

- Continuum of SMC at 6 and 3.4 cm 329
- Evolutionary model for quasars 97
- Interplanetary scintillation power spectra 201
- Interstellar CH at 9 cm 211
- Magnetic fields in supernova remnants 435
- Molonglo source catalogue 4:
 - Magellanic Cloud region S40
 - Abstract to S40 471
- Optical identifications for Parkes 2700 MHz survey (eleventh part) S39
- Parkes 2700 MHz survey: (eleventh part) catalogue S39
- Positions for optical counterparts of some southern radio sources S39
- Abstract to S39 123
- Recombination line emission from galactic equator at 408 MHz 419

Rajan, R. S.—

Hysteresis of primary cosmic rays associated with Forbush decreases 89

Rao, J. R.—

See Karade, T. M. 107

Rao, J. R., Tiwari, R. N., and Nayak, B. K.—

Massive scalar field: source of the graviton and 'strong gravity' 195

Rasul, Ghulam—

See Saleem, M. 227

Relativity

- Effect of Voigt-Palacios-Gordon transformations on thermodynamic quantities 465
- Effects of rotation on a test particle in NUT field 107
- Mach's principle in nonsymmetric field theories 469
- Massive scalar field: source of graviton and 'strong gravity' 195

Nonstatic spherically symmetric solutions for perfect fluid 113

Variation in magnetic field strength during anisotropic gravitational collapse 461

Vorticity of perfect fluid undergoing gravitational collapse 413

Richardson, D. D.—

Extended theory of magnon sideband shapes.

I. Impure three-dimensional ferromagnets 273

II. Impure three-dimensional antiferromagnets 289

Robinson, B. J.—

See Gardner, F. F. 211

Robson, R. E.—

Nonlinear diffusion of ions in a gas.

II. Diffusion in finite enclosures 171

Rose E. K.—

See Cook, J. L. 125

Saleem, M., Irshad, Jawaid, and Rasul, Ghulam—

Dual absorptive model and π^-p backward elastic scattering 227

Savage, Ann, and Wall, J. V.—

New optical identifications from the eleventh part of the Parkes 2700 MHz survey: declinations -4° to -30° , right ascensions 22^h to 05^h S39

Abstract to S39 123

Sharma, A. P.—

See Kumar, Vinod 51

Simpson, M. A.—

The polarization limiting region—an empty concept 343

Sinclair, M. W.—

See Gardner, F. F. 211

Singh, Nirmal—

See Bhati, S. S. 405

Smith, R.—

See Amos, K. 233

Solid state physics

Crystal field effects in S-state ions due to exchange polarization 177

Effect of resonant phonon scattering on thermal conductivity of CaF_2 19

Extended phenomenological models for lattice dynamics of b.c.c. transition metals 31

Extended theory of magnon sideband shapes 273, 289

Isotopic obscuration of anisotropic phonon Umklapp scattering in dielectrics 25

Nature of ionic bond 39

- Spin-Hamiltonian parameters for Eu^{2+}
in host crystals 263
- Statistical distribution of grain sizes and
density in G-5 nuclear emulsions 51
- Temperature modulation studies of
ferromagnetic materials 395
- Southon, J. R., Poletti, A. R., and
Beale, D. J.—
Angular correlations in ^{19}O 355
- Sowerby, B. D.—
Measurement of the energy spectrum of
 ^{60}Ni recoils following ^{60}Co decay using
nuclear resonance fluorescence 149
- Steele, W. F.—
See Barker, F. C. 245
- Suffern, Kevin G.—
See Fackerell, Edward D. 311
- Sydney, K. R.—
See Wilson, G. V. H. 395
- Tassie, L. J.—
Nuclear sum rules, electron scattering
and giant resonances 499
- Thakur, K. P.—
The nature of the ionic bond 39
- Thermal conductivity, anisotropic phonon
Umklapp-dominated, effect of isotopic
phonon scattering on 25
- Thermal conductivity, effect of resonant
scattering on 19
- Thermonuclear reactions: distinguishing
between thermalizing and electrodynamic
coupling for laser compression 375
- Tiwari, R. N.—
See Rao, J. R. 195
