A catalogue of 5 GHz galactic plane sources. *R. F. Haynes, J. L. Caswell and L. W. J. Simons*

*Abstract.* A catalogue at 5 GHz of 915 sources in the galactic plane is presented. Sources with a peak beam brightness temperature of at least 0.2 K above the surrounding background are included, except in confused regions; a point source of 0.2 K corresponds to 0.26 Jy.
