EDITORIAL POLICY

The Society disseminates new scientific knowledge and encourages scientific debate through the medium of its international journal *Proceedings of The Royal Society of Victoria*.

Each volume of the *Proceedings* may consist of two sections:

The 'Proceedings' proper consists of peer reviewed contributions. Each contribution is reviewed by two reviewers and, in the cases of widely divergent reviewer opinions, a third reviewer may be consulted. The editor's decision, through the Editorial Committee, as to the acceptance or rejection of a submitted or reviewed contribution, is final.

The 'Transactions' of the Society consists of unreviewed items of scientific interest such as occasional addresses, articles of debate or discussion or other contributions deemed appropriate by the editor and in the public's interest. The responsibility of the content of such contributions rests solely with the author.

The Society invites contributions for the *Proceedings* from authors across the various disciplines of the physical and natural sciences and on issues concerning technology and the applied sciences.

Honorary Editor: Mary Familiarì
Managing Editor: Peter A. Jell
