Preface ix
Acknowledgements xi
About the author xii

Chapter 1 Introduction to animal nutrition 1
Why is an understanding of animal nutrition important? 2
Digestive systems in animals 6
Analysis of nutrients in feeds 9
Matching the energy requirements of animals with energy in feeds 11
Essential nutrients 18
Dose responses of animals to nutrients and mechanisms of nutrient regulation 30
Integrated biochemistry of animal metabolism 36
References 40

Chapter 2 Digestion in the mono-gastric animal 42
Introduction 43
Anatomy and histology of the mono-gastric digestive tract 47
Secretions of the mono-gastric gastrointestinal tract 52
Absorption of digestion products in mono-gastric animals 56
The gut microbiome 61
References 62

Chapter 3 Digestion in the ruminant animal 64
Introduction 65
Gross anatomy of the ruminant digestive tract 66
Reticulo-rumen motility, eructation, rumination and digesta movements 76
Functions of the omasum and abomasum 81
Microbiology of the reticulo-rumen 82
Nutrient supply from the gastrointestinal tract of ruminants 86
References 94

Chapter 4  Feeding standards for animals 97
Introduction 98
Feed formulation principles 100
The Pearson’s Square: a simple way of making simple rations 101
Feed intake regulation and prediction in animals 102
Energy systems for ruminants and camels 110
Energy systems for horses 114
Energy systems for pigs and poultry 114
Energy systems for cats and dogs 115
Protein systems for ruminants 115
Protein systems for pigs and poultry 117
Protein systems for horses 118
Protein systems for cats and dogs 118
References 119

Chapter 5  Grazing animal nutrition 122
Introduction 123
Components of the grazing system 125
Seasonal patterns of forage production in temperate, Mediterranean, tropical and arid regions 126
The feeding value of pasture plants 130
Feeding behaviour of grazing animals 133
Supplementation of grazing herbivores 139
Grazing and pasture management for sustainable animal production 142
Deleterious factors in rangeland and pasture forages 147
Common nutritional and metabolic diseases of grazing animals 148
References 159

Chapter 6  Sheep and goat nutrition 163
Introduction 164
Digestive anatomy and physiology of sheep and goats 165
Comparative feeding behaviour and digestive physiology of sheep and goats 169
The energy, protein, vitamin and mineral requirements of sheep and goats 170
Nutrition and wool growth 179
