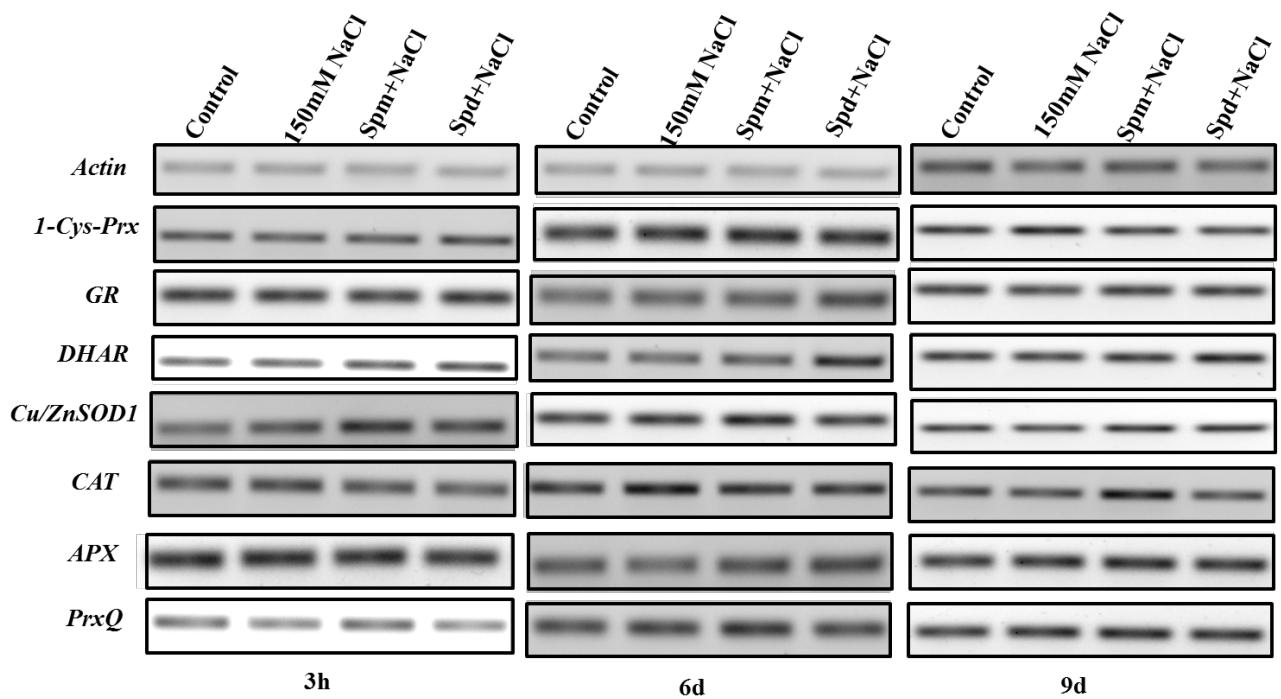

Fig. S1. Semi-quantitative RT-PCR of antioxidant enzymes genes *CAT*, *GR*, *DAHR*, *Cu/ZnSOD1* and *APX*, additionally, expression of *1-Cys-Prx* and *PrxQ* from cDNA of wheat seedlings treatments with exogenous Spm and Spd under salt stress compared with control plants at different time points. Samples standardized to Actin. RT-PCR product were separated on agarose gels (1.5%) and visualized by ethidium bromide stain. *DHAR* dehydroascorbate reductase; *Cu-ZnSOD1* Copper-Zinc superoxide dismutase; *CAT* catalase; *APX* ascorbate peroxidase; *GR* glutathione reductase; *POD* peroxidase; *1-Cys-Prx* 1-cysteine peroxiredoxin; *PrxQ* peroxiredoxin Q.

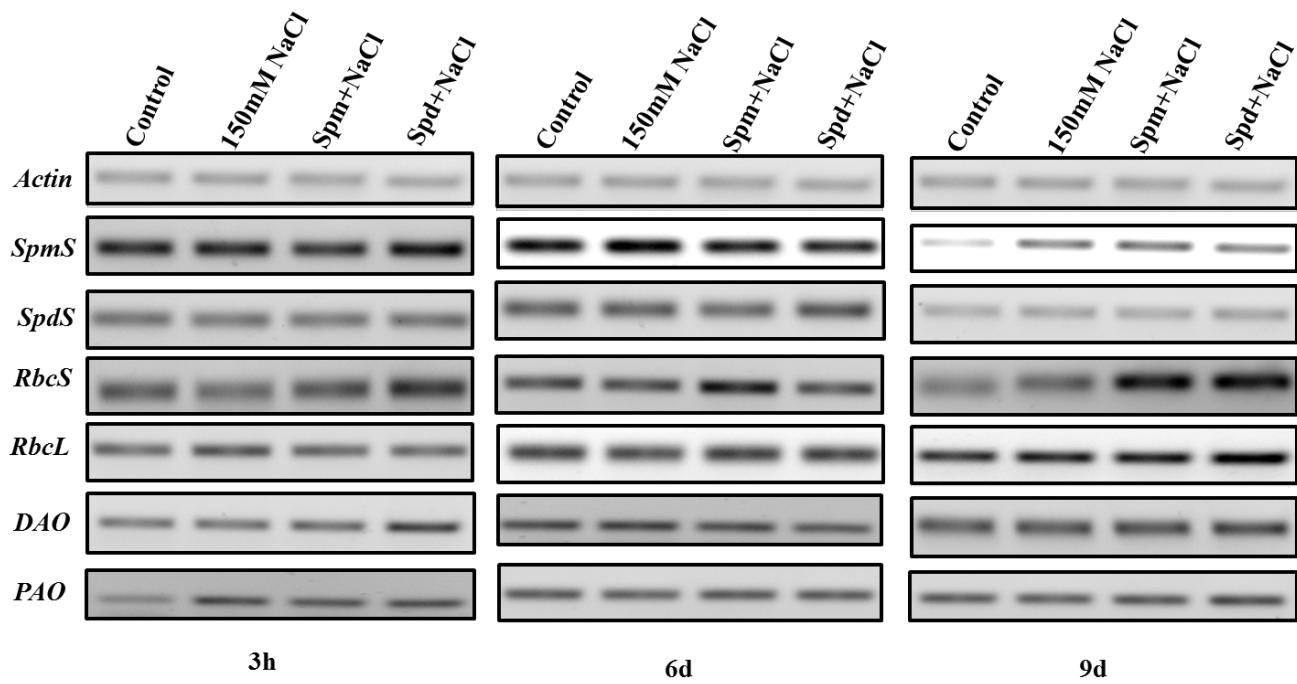

Fig. S2. Semi-quantitative RT-PCR of *RbcL*, *RbcS*, *SpmS* and *SpdS* from cDNA of wheat seedlings treatments with exogenous Spm and Spd under salt stress compared with control plants at different time points. Samples made relative to *Actin* levels. RT-PCR product were separated on agarose gels (1.5%) and visualized by ethidium bromide stain. *RbcL* Ribulose-1,5-bisphosphate carboxylase/oxygenase large subunit; *RbcS* ribulose-1,5-bisphosphate carboxylase/oxygenase small subunit; *SpdS* spermidine synthase; *SpmS* spermine synthase; *DAO* diamine oxidases; *PAO* polyamine oxidases.

Table S1. Primers sequences for semi quantitative and quantitative RT-PCR of the salt-related genes in wheat (*Triticum aestivum* L.) seedlings
