

Functional Plant Biology

Contents

Volume 48 Issue 4 2021

<i>Review: Plant miR397 and its functions</i> Shili Huang, Jiajie Zhou, Lei Gao and Yulin Tang	361–370
Role of antioxidant pool in management of ozone stress through soil nitrogen amendments in two cultivars of a tropical legume Gereraj Sen Gupta and Supriya Tiwari	371–385
Genome-wide identification, phylogenetic analysis and expression profiling of the late embryogenesis-abundant (LEA) gene family in <i>Brachypodium distachyon</i> LiTing Ma, Ting Zhu, HaiRong Wang, Hao Zhou, LeiLei Shao, Qin Ding, DaZhong Zhang and LingJian Ma	386–401
ZxNHX1 indirectly participates in controlling K ⁺ homeostasis in the xerophyte <i>Zygophyllum xanthoxylum</i> Tian-Ge Gao, Cui-Min Ma, Hui-Jun Yuan, Hai-Shuang Liu, Qing Ma, Timothy J. Flowers and Suo-Min Wang	402–410
Root length is proxy for high-throughput screening of waterlogging tolerance in <i>Urochloa</i> spp. grasses Juan de la Cruz Jiménez, Juan A. Cardoso, Lukasz Kotula, Erik J. Veneklaas, Ole Pedersen and Timothy D. Colmer	411–421
Predawn leaf conductance depends on previous day irradiance but is not related to growth in aspen saplings grown under artificially manipulated air humidity Priit Kupper, Ants Kaasik, Mai Kukumägi, Gristin Rohula-Okunev, Linda Rusalepp and Anu Söber	422–433
Genetic factors associated with favourable pollinator traits in the wheat cultivar Piko Takashi Okada, J. E. A. Ridma M. Jayasinghe, Paul Eckermann, Nathan S. Watson-Haigh, Patricia Warner, Mark E. Williams, Marc C. Albertsen, Ute Baumann and Ryan Whitford	434–447
A redundant hydraulic function of root hairs in barley plants grown in hydroponics Shannon Burke, Emma Sadaune, Lisa Rognon, Alexane Fontana, Marianne Jourdrin and Wieland Fricke	448–459
